Oorspronkelijk Gezichte en Gang Naar Huis:

Cultures of Psychiatry and Mental Health Care in Postwar Britain and the Netherlands, 1998 Anti psychiatry is a movement more sloganized than analysed Until now it has been associated in the English speaking world primarily with R D Laing and a coterie of his associates and a radical critique not just of psychiatric hospitalization but of the very premises of psychiatry itself and the basic institutions of society especially the family But are these notions accurate or rather distorted images created by Laing himself or by the media In this book which has emerged out of an Anglo Dutch conference held in June 1997 the realities of critical psychiatry are explored using comparisons and contrasts between the British and the Dutch experiences as a probe There were it turns out various distinct anti psychiatries indeed hardly anybody actually used that label about themselves and they played a role in the reform no less than the rejection of regular psychiatry *Pragmatic Idealism* Axel Wüsthube, Michael Quante, 1998 From the contents Moral facts and objective values Timo Airaksinen Values and reasons Leonardo Rodriguez Dupla Rescher on evolution and the intelligibility of nature George Gale The nature of philosophy John Kekes Individual and other person morality a plea for an emotional response to ethical problems Peter Machamer Was Spinoza a person Raymond Martin

Trends in EU Health Care Systems Winfried de Gooijer, 2007-03-20 For decades the nations of the European Union wrote the book on universal health coverage Recent economic developments however have created problems ranging from widening inequities of care to growing numbers of uninsured a progression expertly described by Win de Gooijer in *Trends in EU Health Care Systems* De Gooijer's dual background as an economist and the CEO of Dutch health care corporations together with his broad international experience give him a unique understanding of his subject He traces world economic currents that have affected quality of and access to health care throughout the EU trends that took years to develop but are coming to rapid fruition Comparative illustrations from Europe and the US show national interests at odds with global ones as governments transfer social responsibilities to market driven agencies Included in his discussion Expansion versus reform a forty year analysis of Europe's health care systems Why governments cannot completely control the always evolving dynamics of health care Ethical and medical issues arising from the continent's changing politics Predictions on future directions in EU health care how much change is possible how much is necessary Some may find De Gooijer's ideas startling and the book is bound to be the subject of controversy But it is critical reading for health care managers and policymakers politicians and insurers advanced students of public health in short anyone looking to Europe for the next phase of this far reaching evolution This book is a very important contribution to the debate about the future direction of health policy in Europe It captures the economic and social trends that underpin health systems with a keen and objective eye and poses some very challenging questions about the future It will not be a comfortable read for politicians but it is a book that must be read Brian Edwards President of the European Hospital and Health Care Federation HOPE The concept of subsidiarity is prohibitive to a sound discussion of health care systems on a

European level Economic principles dominate the debate and their consequences for health care are hardly understood The author bridges the gap between economic and health care developments and wrote a book that is essential reading for policy makers and health care managers who really care Rob Koning Past President of the European Health Management Association EHMA The future development of European health policy should not be an exclusively political affair Hospital managers should also be actively involved particularly as regards the design and organization of present and future European hospitals For this purpose this book is a useful and well founded manual It not only clarifies the dangers but also points to the challenges and possible alternative policy options Therefore this book should be in the boardroom of each and every European hospital Willy Heuschen Secretary General of the European Association of Hospital Managers EAHM Win de Gooijer brings immense clarity to a complex issue In this book he draws major and new conclusions and raises many challenging questions We hope this book will draw the attention it deserves G rard Vincent President International Hospital Federation
