Philosophy of Education in the On-Life Era: The Journey Towards a New Conceptualization of Learning Černý, Michal,2024-09-27 In the infosphere era the philosophy of education must evolve to address new methods of learning and knowledge communication The infosphere era is characterized by the presence of data and rapid technological advancements calling for a reevaluation of traditional educational frameworks It recognizes the importance of developing digital literacy fostering adaptability and nurturing skills for navigating an ever changing educational landscape Education must now prepare learners to thrive in a complex interconnected world where the boundaries between information technology and human experience are increasingly blurred Philosophy of Education in the On Life Era The Journey Towards a New Conceptualization of Learning offers a comprehensive view of the transformation of the philosophy of education in the infosphere age It uses Luciano Floridi s of transforming educational process ideas as well as Heideggrian phenomenology

and pragmatism to highlight aspects of contemporary philosophy of education and perspectives for effective solutions This book covers topics such as educational technologies information literacy and pedagogy and is a useful resource for philosophers education professionals professors teachers academicians scientists and researchers   The Online Self Soraj Hongladarom,2016-07-27 This book investigates the emerging phenomenon of the self as it exists in the online world It argues for an externalist conception of self and identity one that does not depend on the continuity of consciousness of the subject It also offers an analysis of related phenomenon such as online friendship and games based on this analysis An outstanding feature of social networking sites such as Facebook and MySpace is that it allows for the user to put forward their selves or their identity onto the Internet and use the online self as an anchor to connect with any number of friends each of whom also has their own online selves A number of questions then arise which are deeply conceptual and philosophical in nature What is the metaphysical nature of this emerging online self Is it the same or fundamentally different from the offline self with which we are already familiar Since increasing numbers of people are connected to the online world this world itself seems to be taking on a reality of its own This much has been appreciated by a number of scholars in the field However there seems to be lacking a systematic study of the philosophical and metaphysical nature of the self that has become a key element in cyberspace a key topic which this volume addresses Apart from the problem of constitution of the online self this volume addresses related questions concerning personal identity in the online world and scrutinizes computer games and the characteristics that they share with social networking sites Unlike the majority of the existing literature which discusses the topic from a more social scientific perspective this volume fills the lacuna of a philosophical and theoretical study of the online world   Philosophy and Engineering Diane P. Michelfelder,Byron Newberry,Qin Zhu,2016-11-26 This volume the result of an ongoing bridge building effort among engineers and humanists addresses a variety of philosophical ethical and policy issues emanating from engineering and technology Interwoven through its chapters are two themes often held in tension with one another Exploring Boundaries and Expanding Connections Expanding Connections highlights contributions that look to philosophy for insight into some of the challenges engineers face in working with policy makers lay designers and other members of the public It also speaks to reflections included in this volume on the connections between fact and value reason and emotion engineering practice and the social good and of course between engineering and philosophy Exploring Boundaries highlights contributions that focus on some type of demarcation Public policy sets a boundary between what is regulated from what is not academic disciplines delimit themselves by their subjects and methods of inquiry and professions approach problems with unique goals and by using concepts and language in particular ways that create potential obstacles to collaboration with other fields These and other forms of boundary setting are also addressed in this volume Contributors explore these two themes in a variety of specific contexts including engineering epistemology engineers social responsibilities engineering and public policy making engineering innovation and the affective dimensions of

engineering work The book also includes analyses of social and ethical issues with emerging technologies such as 3 D printing and its use in medical applications as well as social robots Initial versions of the invited papers included in this book were first presented at the 2014 meeting of the Forum on Philosophy Engineering and Technology fPET held at Virginia Tech in Blacksburg Virginia USA The volume furthers fPET s intent of extending and developing the philosophy of engineering as an academic field and encouraging conversation promoting a sense of shared enterprise and building community among philosophers and engineers across a diversity of cultural backgrounds and approaches to inquiry **Readings in Cyberethics** Richard A.
