**Readicide** Kelly Gallagher, 2023-10-10 *Readicide* The systematic killing of the love of reading often exacerbated by the inane mind numbing practices found in schools Reading is dying in our schools Educators are familiar with many of the factors that have contributed to the decline poverty second language issues and the ever expanding choices of electronic entertainment In this provocative book *Readicide How Schools are Killing Reading and*

What You Can Do About It author and teacher Kelly Gallagher suggests it is time to recognize a new and significant contributor to the death of reading in our schools. Readicide. Gallagher argues that American schools are actively though unwittingly furthering the decline of reading. Specifically he contends that the standard instructional practices used in most schools are killing reading by valuing standardized testing over the development of lifelong readers. Mandating breadth over depth in instruction. Requiring students to read difficult texts without proper instructional support and insisting students focus on academic texts. Ignoring the importance of developing recreational reading. Losing sight of authentic instruction in the looming shadow of political pressures. Readicide provides teachers, literacy coaches and administrators with specific steps to reverse the downward spiral in reading steps that will help prevent the loss of another generation of readers.

**Handbook of Research on Transforming Teachers' Online Pedagogical Reasoning for Engaging K-12 Students in Virtual Learning** Niess, Margaret L., Gillow-Wiles, Henry, 2021-06-25. The COVID 19 pandemic drastically transformed the classroom by keeping students and teachers apart for the sake of safety. As schools emptied, remote learning rapidly expanded through online services and video chatrooms. Unfortunately, this disrupted many students and teachers who were not accustomed to remote classrooms. This challenge has forced K-12 teachers to think differently about teaching. Unexpectedly and with little time to prepare, they have been confronted with redesigning their curriculum and instruction from face-to-face to online virtual classrooms to protect students from the COVID 19 virus while ensuring that these new online initiatives remain sustainable and useful in the post-pandemic world. As teachers learn to take advantage of the affordances and strengths of the multiple technologies available for virtual classroom instruction, their instruction both in online and face-to-face will impact what and how students learn in the 21st century. The Handbook of Research on Transforming Teachers' Online Pedagogical Reasoning for Engaging K-12 Students in Virtual Learning examines the best practices and pedagogical reasoning for designing online strategies that work for K-12 virtual learning. The initial section provides foundational pedagogical ideas for constructing engaging virtual learning environments that leverage the unique strengths and opportunities while avoiding the weaknesses and threats of the online world. The following chapters present instructional strategies for multiple grade levels and content areas, best practices that work, clearly describing why they work and the teachers' pedagogical reasoning that supports online implementations. The chapters provide ways to think about teaching in virtual environments that can be used to guide instructional strategy choices and recognizes the fundamental differences between face-to-face and virtual environments as an essential design component. Covering such topics as K-12 classrooms, pedagogical reasoning and virtual learning, this text is perfect for professors, teachers, students, educational designers and developers, instructional technology faculty, distance learning faculty and researchers interested in the subject.

**From Boardbook to Facebook** Adele M. Fasick, 2011-07-13. Discover new approaches for extending children's library services beyond the library building and learn how to utilize technology to bring learning to children wherever they may be.

The ways in which we communicate learn and interact have changed drastically in the last decade and this worldwide revolution applies to the youngest members of society as well Today s books and learning materials are being presented and used in new and different ways From the toddler s first boardbooks to the young teen s conversations on Facebook children are interacting with print and media rather than passively listening or viewing Libraries can contribute to this interactive world by inviting children to take an active role in their library collection and library service experiences This book examines the impact of new technologies on children s experiences of books and libraries and demonstrates how librarians can adapt to new technologies and integrate library services into the lives of today s children From Boardbook to Facebook Children s Services in an Interactive Age draws on current research to illuminate how children s use of media has changed in recent years and suggests ways in which new technologies can be integrated into library services now and in the future *Digital Solidarity in Education* Mary T. Whatever phase you are in at the moment, this book provides you with guidance and assurance, both medical and legal, that will help you raise a strong-willed individual. Download this book today.

*Improving Literacy Through Home, School, and Community Partnerships* Gatcho, Al, Rynne Gabonada, Titir-Improgo, Cecille Marie, Gutierrez, Merry Ruth Morauda, 2024-04-09. The underappreciation of the pivotal roles played by home, school, and community in shaping the literacy journey of individuals. While the mantra "Literacy begins at home" resonates, it often remains a mere platitude rather than a transformative force. The synergy between these three pillars is essential, yet gaps persist, hindering the development of a truly literate society. As children tread the academic path, the home lays the foundation, and schools amplify these efforts. However, the holistic nature of learning, encompassing life experiences, demands a collaborative approach from families, educators, and communities. This is the crux of the problem: a disjointed system that impedes the seamless development of literacy across diverse backgrounds. *Improving Literacy Through Home, School, and Community Partnerships* is a groundbreaking book that unravels the complexities of this challenge and illuminates the transformative potential within collaborative efforts. By delving into the dynamic interplay between home, school, and community, the book offers a roadmap to bridge existing gaps and forge a path toward a more literate society. Early career researchers will find this a valuable resource to identify and address these gaps, while families, educators, community leaders, and policymakers will gain invaluable perspectives to inform their practices, policies, and research initiatives.
