Ontmoetingen Met Paragnosten:

Ontmoetingen met paragnosten Wilhelm Heinrich Carl Tenhaeff, 1979 Science Confronts the Paranormal Kendrick Frazier, 2023-10-17 A Gallop poll surveyed 506 American teenagers aged 13 to 18 and discovered the following 69% believe in angels 59% believe in ESP 55% believe in astrology 28% believe in clairvoyance 24% believe in Bigfoot 22% believe in witchcraft 20% believe in ghosts 18% believe in the Loch Ness Monster Carl Sagan has said that the wonders of real science far surpass the supposed and imagined mysteries of fringe science Yet as statistics show the paranormal is still an endless source of fascination for people around the world This collection of critical essays and investigative reports examines virtually every area of fringe science and the paranormal from a refreshingly scientific and clear minded viewpoint The authors are noted scientists philosophers psychologists and writers All bring to the task a determination to sift sense from nonsense and fact from fiction in an area notorious for misinformation misperception self delusion and wishful thinking They do so in a way that highlights the differences between real science and pseudoscience They've made special efforts first to find the actual facts behind numerous claims that have popular appeal and then to explain and communicate what scientific investigation and reasoning reveal about them Subjects treated to incisive and entertaining examination include astrology ESP psychic detectives psychic predictions parapsychology remote viewing UFOs creationism the Shroud of Turin coincidences cult archaeology palmistry and fringe medicine There are also explorations of the implications of paranormal beliefs for science education *The Twelfth House* Karen Hamaker-Zondag, 1991-10-01 Examines the general effect of the 12th house planets the Sun Moon and Saturn in the 12th or aspecting ruler of the 12th how to work with the 12th house during various cycles of life The author works with the language of the unconscious and with active imagination and visualization techniques to take advantage of 12th house energies **Legitimacy of Unbelief** Gerd H. Hövelmann, Hans Michels, 2017 Dutch journalist Piet Hein Hoebens 1948-1984 held a unique position in the controversies between proponents and skeptics of parapsychology and related fields While he described himself as a card carrying skeptic with strong ecumenical leanings even many of his nominal opponents appreciated his work and his penetrating open minded criticism Hoebens constructive influence on the culture of responsible scientific exchange is felt to this day The editors have collected and mostly translated more than 40 of Hoebens most significant writings about half of which were never published in English before The editors also added editorial introductions to all chapters to elucidate their original contexts and their lasting relevance Therefore the book is more than a commemoration of an important author it provides valuable insights into the history of parapsychology and its skeptical reflections Back cover **Intercultural Encounters** Wim M. J. van Binsbergen, 2003 This book brings together fifteen essays investigating aspects of interculturality Like its author it operates at the borderline between social anthropology and intercultural philosophy It seeks to make a contribution to intercultural philosophy by formulating with great precision and painful honesty the lessons deriving from extensive intercultural

experiences as an anthropologist Its culminating section presents an intercultural philosophy revolving on the tenet cultures do not exist The kaleidoscopic nature of intercultural experiences is reflected in the diversity of these texts Many belong to a field that could be described as meta anthropology others are more clearly philosophical occasionally they spill over into belles lettres ancient history and comparative cultural and religious studies The ethnographic specifics supporting the arguments are diverse deriving from various African situations in which the author has conducted participatory field research Tunisia Zambia Botswana and South Africa *Perspectives on Synchronicity, Inspiration, and the Soul* Rico Sneller, 2020-07-07 This book explores the notion of the human psyche soul and its continuing usefulness in the background of the ongoing and always accelerating techno scientific revolution The main argument here follows the assumption that this revolution while not necessarily being a threat to humankind is often blind or ignorant as to its subject the human being In the first chapters the reader is invited to reflect on the notion of thinking as a phenomenon of consciousness that transcends merely having thoughts Relating thinking to consciousness requires reconsidering the phenomena of inspiration and ecstasy Provided that such a thing as inspiration exists it makes sense to revise the solipsist or substantialist account often given of the human mind The book defines inspiration as a clairvoyance of one's psyche and ecstasy as the experience of this clairvoyance Next a case is made for synchronicity experiences as a key to a better understanding of the human psyche While being enigmatic all throughout synchronicity experiences both on the individual and on the collective level help overcome both subject object and body mind dualisms It is not likely though that the solution they could offer will be readily accepted by what is called science today since it challenges one of the latter's basic premises causality As a more concrete example of a condensed synchronicity experience the author dwells on physiognomy In the final chapter death and suffering are discussed as extreme and therefore relevant experiences of consciousness The book interprets death in terms of enhanced subliminality and suffering as unconscious resistance against maturing Generally this book explores a psycho philosophical tradition rooted in Romantic thinking from Schelling and Schopenhauer until Klages and Jung which has hitherto been unjustly neglected if not repressed by mainstream materialism and positivism It makes a strong case for an intellectual account of the soul

muziek noemen is in de loop van millennia veranderd in een gigantische opeenhoping van intellectueel afval gekruid met religieuze necromantie zonder dat iemand stopte om orde in deze puinhoop te brengen Het misbruik van zoveel irrationaliteit heeft van muziek een verboden terrein gemaakt voor hen die de rede gebruiken en is alleen toegankelijk voor geheugen en herhaling Muziek lijdt Van Pythagoras die twaalf noten wilde bereiken door zeven reeksen van elk zeven noten te combineren tot de monnik Guido van Arezzo die op het idee kwam om muziek met inkt op te nemen zodat zijn melodie n niet zouden degenereren wanneer hij van het ene klooster naar het andere ging Hij bedacht de notenleer die onderworpen was aan de obsessie om te vermijden een vermeende vervloekte triton te spelen die Satan zou aanroepen en de goede christen naar de meest verschrikkelijke hellen zou slepen Deze gebeurtenis maakte paus Johannes XIX enthousiast die de universele aanhouding van hem goedkeurde Een andere monnik mocht niet ontbreken Miguel Garc a alias Padre Basilio die aan het einde van de 18e eeuw zoveel snaren op de gitaar zette dat hij met het probleem kwam te zitten dat hij niet genoeg vingers had om drie noten met zes snaren te spelen met slechts vier vingers dus wijdde hij zich aan het organiseren van geforceerde houdingen zodat het nieuwe instrument niet al te slecht zou klinken De meeste muzikanten lijken zich niet bewust te zijn van het feit dat we in de 21e eeuw leven dat we tot twaalf kunnen tellen dat we apparaten hebben om muziek op te nemen die beter zijn dan Chinese inkt en dat we vijf vingers aan onze rechterhand hebben om te selecteren welke snaren om te spelen en niet om te spelen alleen een misvormde stomp om ze te scheuren We weten dat geluid wordt geproduceerd in het auditieve bewustzijn We weten ook hoe we horen op basis van onze anatomie en we hebben neurowetenschappelijk onderzoek gedaan waarmee we harmonie hebben gedefinieerd op basis van subjectieve relatieve dissonanten en zelfs dat het belangrijkste ritme is wat muziek trekt Muziek verschilt van lawaai in zijn eenvoud en als er iets is dat een gezond brein meer haat dan complexe geluiden dan zijn het de praktische toepassingen van irrationele theorie n die geen ruimte laten voor logica Na meer dan veertig jaar te hebben besteed aan het proberen te begrijpen van het onbegrijpelijke is de tijd gekomen om een muziektheorie te ontwikkelen die het simpele op een eenvoudige manier uitlegt Zo eenvoudig dat het deze prachtige kunst toegankelijk maakt voor iedereen die wat tijd heeft en zin heeft om plezier te hebben **Nederlandsch letterkundig nieuwsblad** ,1980
