Studio Lighting Unplugged Rod Deutschmann, Robin Deutschmann, 2014-12-26 This lighting manual shows that successful studio photography does not require a warehouse sized space brimming with expensive lights Hollywood style facades and a half dozen assistants making the client lattes Rather this guide shows photographers how to create studio lighting effects that range from clean and classic to highly complex and use a garage spare bedroom or even a

backyard as their studio The simple setups show that one to three small inexpensive electronic flash units along with budget friendly stands communication systems and some do it yourself light modifiers can be combined to create brilliant studio quality images without the studio Numerous sample shoots and plans provide clear instructions for taking control of any environment to create spectacular images *On-Camera Flash*, 2015-10-19 Photographers are always looking for perfect light Unfortunately the quality of available light and the situations in which photos are created are rarely perfect This is especially true when photographing weddings or portraits on location So while finding beautiful existing light is every photographer's ideal it isn't always possible This is the point at which photographers tend to reach for a portable on camera flash Indeed these intense light sources can prove invaluable but only if you know how to use them effectively In the hands of an inexperienced photographer on camera flash will produce images that look flat and lifeless images with harsh shadows washed out skin tones cavernous black backgrounds and other unappealing visual characteristics In this book acclaimed wedding and portrait photographer Neil van Niekerk shows you how to avoid the pitfalls photographers new to speedlights often encounter so that you can produce professional images using on camera flash You'll learn to use simple accessories to manipulate the quality of light from your flash and how to improve a lighting scenario by enhancing rather than overwhelming the existing light When the available light is too low and too uneven to be combined with flash he shows you how to override it completely with flash and with some thought and careful application of specialized techniques still get results that look great On camera flash is one of the most challenging light sources to master but with the techniques in this book you'll learn to use it with confidence For wedding and environmental portrait photographers who must work in ever changing lighting scenarios this can mean better images and better sales [Run and Gun Lighting Resource](#) Nick Fancher, 2014-03-21 In Run and Gun One Light Solutions for Commercial and Portrait Photographers photographer Nick Fancher discusses more than 20 one light photo scenarios and setups for both portraits and product commercial work showing finished images as well lighting diagrams as he discusses each photograph This ebook was written for the photographer who has just picked up a flash and has the ability to trigger it from somewhere other than the top of their camera It does not cover the buttons and dials of your camera or flash but instead Nick quickly and efficiently discusses different kinds of photographs you can accomplish with your newly acquired flash images such as portraits and product shots created with soft light hard light with a colored gelled fill light and much more Additionally he covers using your flash to overpower the sun as well as how to creatively use a slower shutter speed to create powerful aesthetic effects in your images Finally Nick shares a series of product shots he created as a self assignment to further develop his own lighting editing and styling skills After reading and working through Run and Gun you'll be armed with ideas and techniques to head out and create similar images with your newly acquired flash [Mastering Digital Flash Photography](#) Chris George, 2008 Electronic flash not only brings light to a photograph it can be an important artistic tool if you've acquired the knowledge to

use it creatively To master those skills digital photographers need only turn to this complete reference Packed with inspirational photos it takes the mystery out of flash covering every type of equipment and explaining such essentials as guide numbers sync speeds white balance and more Photographers will see how fill flash can decrease contrast and shadows in outdoor portrait photography understand how to control the light using bounce and multiple flash techniques and expertly employ high speed and rear curtain synchronization to create impressive motion blur images Everything you need to know is here including a section on studio flash and computer processing

Flash Photography , Crafting the Natural Light Look Sandra Coan, 2020 Learn to use a one light approach for recreating the look of beautiful natural window light for portraiture. At its best natural light is magical for portraiture. The quality of natural light streaming through a window can be extraordinary gorgeous wrapping light that flatters your subject and can be used to create multiple looks. For years photographer Sandra Coan exclusively used natural light in her portraiture work. And while the results could be magnificent she also learned that she could not rely on it to build a business and create consistently great photographs. That's because natural light is frustratingly unpredictable sometimes it rains sometimes the light is too harsh when your clients are available and sometimes depending on the time of year it's just too dark. In order to grow her business with dependably great results and a high level of professionalism Sandra finally decided to tackle artificial light. She spent years honing her ability to use artificial light to recreate the look of beautiful natural light. And now with a simple one light approach she produces natural light whenever and wherever she likes creating great

portraits in any situation at any time of day or night It s an approach that has led to a successful career spanning two decades and a signature look to her work Here in Crafting the Natural Light Look Sandra shares her knowledge and techniques so that you too can learn to quickly and dependably create the look of natural light in your own portraiture Unlike other books that address artificial light Sandra s tone is conversational and easygoing and she does not cover everything there is to know about artificial light In fact there are no two or three light setups here Instead Sandra s method is straightforward and easily actionable She covers The key characteristics of light intensity distance direction Equipment strobes flashes light meters triggers receivers modifiers reflectors and light stands including what she uses and what she recommends if starting out on a budget Shutter speed and its relationship with artificial light Where to position the light and the subject for consistent flattering results Creating four lighting patterns and looks with one setup flat light loop light side light and backlight Using a light meter to determine the perfect flash power whether you shoot film or digital Working with individuals families and groups The role of shadows in its contribution to the drama and mood of a portrait Common mistakes and how to avoid them What she does in post production very little Finally in a series of case studies she brings it all together and shares her thought process as she works through a number of real world portrait shoots from start to finish If you re a natural light photographer who s been either struggling with flash or reluctant to learn it at all Crafting the Natural Light Look is exactly the book you need to improve the quality and consistency of your portraiture Just One Flash Rod Deutschmann,Robin Deutschmann,2011 A guide to flash photography using a single flash covers the use of pop up external wired and wireless flashes for photographs in a variety of settings
