The Rise of Comparative Policing Jacques de Maillard, Sebastian Roché, 2021-08-26 This book argues that policing should be studied in a truly comparative manner as a way of identifying more accurately the diverse features of police organisations and the trends which affect contemporary policing Studying policing comparatively is also a way to develop more sophisticated theories on the relations between police state and society aiming at higher degree of generalization In

particular broadening the empirical basis often limited to Western countries favours the formulation of more encompassing theories The comparative analysis then is used to refine meso or macro theories on various aspects of policing The book covers the challenges of comparative research in diverse areas of policing studies with innovative tools and approaches to allow for the development of that subfield of policing It is a significant new contribution to policing studies and will be a great resource for academics researchers and advanced students of Public Policy Sociology Political Science and Law The chapters in this book were originally published in *Policing and Society* Security Governance in East Africa Kennedy Agade Mkutu, 2017-12-15 This collection of cases from East Africa contributed largely by locally based authors explores the increasing security governance phenomenon in the region that is the mix of state and non state actors including private entities volunteer auxiliaries homegrown vigilantes and gangs and the relationship between police and communities Local dynamics brought by globalization liberalization the new scramble for resource wealth inequality and international terrorism are observed in detail superimposed upon the well known development challenges ethno-political divides and patterns of government and security provision which continue to reflect their colonial past This book raises both practical and theoretical ethical dilemmas of the increasing fragmentation of security functions within Uganda Kenya South Sudan mainland Tanzania and Zanzibar It is a vital contribution to the non state plural policing debates and is of both local and global relevance Handbook of Criminal Investigation Tim Newburn, Tom Williamson, Alan Wright, 2012-08-21 This book provides the most comprehensive and authoritative book yet published on the subject of criminal investigation a rapidly developing area within the police and other law enforcement agencies and an important sub discipline within police studies The subject is rarely out of the headlines and there is widespread media interest in criminal investigation Within the police rapid strides are being made in the direction of professionalizing the criminal investigation process and it has been a particular focus as a means of improving police performance A number of important reports have been published in the last few years highlighting the importance of the criminal investigation process not only to the work of the police but to public confidence in this Each of these reports has identified shortcomings in the way criminal investigations have been conducted and has made recommendations for improvement The Handbook of Criminal Investigation provides a rigorous and critical approach to not only the process of criminal investigation but also the context in which this takes place the theory underlying it and the variety of factors which influence approaches to it It will be an indispensable source of reference for anybody with an interest in and needing to know about criminal investigation Contributors to the book are drawn from both practitioners in the field and academics *Corporate Investigations, Corporate Justice and Public-Private Relations* Clarissa A. Meerts, 2019-08-26 This book seeks to understand the investigation and settlement of employer employee disputes within companies It argues that there is effectively no democratic knowledge about or control over corporate security due to companies preference for private out of court settlements when faced with norm violations raised by employees This book

fills the knowledge gap by providing an overview of the corporate security sector including legal frameworks and an analysis of the role and powers of private investigative services inhouse security forensic accountants and forensic legal investigators It draws on close observation case studies and interviews with practitioners in and around the industry Corporate Investigations Corporate Justice and Public Private Relations also looks at public private relationships in this sector to propose policy remedies applicable to all corporate security providers regardless of the disparate professional backgrounds and skill sets of their staff

Intimate Partner Violence, Risk and Security Kate Fitz-Gibbon,Sandra Walklate,Jude McCulloch,JaneMaree Maher,2018-06-14 This edited collection addresses intimate partner violence risk and security as global issues Although intimate partner violence risk and security are intimately connected they are rarely considered in tandem in the context of global security Yet intimate partner violence causes widespread physical sexual and or psychological harm It is the most common type of violence against women internationally and is estimated to affect 30 per cent of women worldwide Intimate partner violence has received significant attention in recent years animating political debate policy and law reform as well as scholarly attention In bringing together a range of international experts this edited collection challenges status quo understandings of risk and questions how we can reposition the risk of IPV and particularly the risk of IPH as a critical site of global and national security It brings together contributions from a range of disciplines and international jurisdictions including from Australia and New Zealand United Kingdom Europe United States North America Brazil and South Africa The contributions here urge us to think about perpetrators in more nuanced and sophisticated ways with chapters pointing to the structural and social factors that facilitate and sustain violence against women and IPV Contributors point out that states not only exacerbate the structural conditions producing the risks of violence but directly coerce and control women as both citizens and non citizens States too should be understood as collaborators and facilitators of intimate partner violence Effective action against intimate partner violence requires sustained responses at the global state and local levels to end gender inequality Critical to this end are environmental issues poverty and the divisions often along race and ethnic lines underpinning other dimensions of social and economic inequality
