Elements of Responsible Politics B.P. Dauenhauer, 2012-12-06 This collection of essays draws together work done during a period of more than fifteen years In the course of these years much has changed including much about politics Patterns of political activity have been transformed Ways in which we had been accustomed to construe politics have been substantially modified and sometimes replaced Some apparently intractable conflicts have been resolved Other apparently more manageable conflicts have shown shocking durability A number of political doctrines once considered indefinitely serviceable have lost all relevance And the material and technical resources at our disposal look strikingly different than they did just a few years ago Practical politics of whatever stripe encounters at every turn ever more grave environmental degradation But or so this collection assumes not everything political has changed Some political issues both theoretical and practical remain persistently trenchant Questions like the following demand ever renewed consideration What is the point and worth of belonging to a political community What entitlements and responsibilities follow upon such membership Or even more fundamentally what conditions are required for there to be politics at all Taken together the essays collected in this volume propose a way both to understand and to engage in politics which is properly responsive both to perennial political issues and to the peculiar exigencies of our era Some of them present criticisms of widely held warmly cherished ways of addressing political matters Others propose constructive alternatives

Utopia's Garden E. C. Spary, 2010-12-15 The royal Parisian botanical garden the Jardin du Roi was a jewel in the crown of the French Old Regime praised by both rulers and scientific practitioners Yet unlike many such institutions the Jardin not only survived the French Revolution but by 1800 had become the world's leading public establishment of natural history the Muséum d'Histoire Naturelle E C Spary traces the scientific administrative and political strategies that enabled the foundation of the Muséum arguing that agriculture and animal breeding rank alongside classification and collections in explaining why natural history was important for French rulers But the Muséum's success was also a consequence of its

employees Revolutionary rhetoric by displaying the natural order they suggested the institution could assist in fashioning a self educating self policing Republican people Natural history was presented as an indispensable source of national prosperity and individual virtue Spary s fascinating account opens a new chapter in the history of France science and the Enlightenment

William Wordsworth Second Generation Romantic provides a truly comprehensive reading of late Wordsworth and the full arc of his career from 1814 1840 revealing that his major poems after Waterloo contest poetic and political issues with his younger contemporaries Keats Shelley and Byron Refuting conventional models of influence where Wordsworth fathers the younger poets Cox demonstrates how Wordsworth s later writing evolved in response to second generation romanticism After exploring the ways in which his younger contemporaries rewrote his Excursion this volume examines how Wordsworth s Thanksgiving Ode enters into a complex conversation with Leigh Hunt and Byron how the delayed publication of Peter Bell

could be read as a reaction to the Byronic hero how the older poet's River Duddon sonnets respond to Shelley's Mont Blanc and how his later volumes particularly *Memorials of a Tour in Italy* 1837 engage in a complicated erasure of poets who both followed and predeceased him

The City-State of the Soul Kevin Crotty, 2016-04-29 The City State of the Soul Self Constitution in Plato's Republic explores Plato's idea that the moral life consists in the founding of one's own soul This insight is central to the long argument of the Republic and in particular to the complex relation between the city and the human soul This fruitful picture of the moral life however has not received the attention it deserves As Kevin M Crotty argues Plato's distinctive insight is that justice is above all a creative force Plato presents justice not as a relation amongst fully formed individuals but rather as the quality that galvanizes a diverse welter of disparate parts into a coherent entity above all a soul or a city Justice then is the virtue most closely associated with being the source of its philosophical stature Plato presents a conception of justice meant to impress the young bright and ambitious as a noble pursuit and a task worthy of their best talents The City State of the Soul is written for anyone interested in the Republic including but not limited to students and scholars of ancient philosophy political philosophy ethics and ancient Greek literature

The Religion of Chiropractic Holly Folk, 2017-03-13 Chiropractic is by far the most common form of alternative medicine in the United States today but its fascinating origins stretch back to the battles between science and religion in the nineteenth century At the center of the story are chiropractic's colorful founders D D Palmer and his son B J Palmer of Davenport Iowa where in 1897 they established the Palmer College of Chiropractic Holly Folk shows how the Palmers system depicted chiropractic as a conduit for both material and spiritualized versions of a vital principle reflecting popular contemporary therapies and nineteenth century metaphysical beliefs including the idea that the spine was home to occult forces The creation of chiropractic and other Progressive era versions of alternative medicine happened at a time when the relationship between science and religion took on an urgent increasingly competitive tinge Many remarkable people including the Palmers undertook highly personal reinterpretations of their physical and spiritual worlds In this context Folk reframes alternative medicine and spirituality as a type of populist intellectual culture in which ideologies about the body comprise a highly appealing form of cultural resistance
