As remote work has become routine cloud based technology tools have become increasingly necessary to communicate with other library staff and with faculty and staff to continue providing seamless and uninterrupted access to library resources and collections for our campus community Cloud based technology tools such as Google Forms and Google Sheets are used to gather faculty requests for collection development tools such as Tableau are

used to illustrate material budget balances and platforms such as Trello have been adopted to track subscription renewal cycles and manage other projects This guide discusses the benefits of using these powerful cloud based and little to no additional cost technology tools through the lens of a particular area in librarianship such as documentation data and project management communication data storage and data visualization While the real world examples provided throughout focus on technical services staff operations specifically acquisitions and electronic collection management each tool s features and use cases are transferable among all areas of librarianship This guide provides insights into how collaborative dynamic and accessible these cloud based solutions are for a technologically shifting workplace as well as considers the challenges to adopting cloud based solutions such as administrative buy in aversion to change and steeper learning curves as well Readers will gain practical experiential examples that have been instrumental in creating efficiencies in collection management workflows for technical services staff The use cases illustrated exemplify enhancements that librarians can incorporate into their own collection management practices to further engage with their colleagues their patrons and their larger communities more effectively and efficiently

Enterprise Mac Administrators Guide CHARLES EDGE, William Smith, 2015-11-28 Charles Edge and Bill Smith provide detailed explanations of the technology required for large scale Mac OS X deployments and show you how to

integrate it with other operating systems and applications Now in its second edition Enterprise Mac Administrator's Guide addresses the growing size and spread of Mac OS X deployments in corporations and institutions worldwide In some cases this is due to the growth of traditional Mac environments but for the most part it has to do with organizations instituting device choice and switcher campaigns where Windows and or Linux environments are migrating to Mac OS X There is a steep culture shock with many of these migrations The products that are used are different the nomenclature is different and most importantly the best practices for dealing with the operating system and updates are very different Apple provides a number of tools to help automate and guide IT toward managing a large number of Mac OS X computers it has since before Mac OS X was initially released However if you want to put together all of the pieces to tell a compelling story about how to run an IT department or a deployment of Macs you need to compile information from a number of different sources This book provides explanations of the technology required What You'll Learn Choose a directory services model that works for your organization and integrate it into your existing model Choose an imaging model and begin imaging workstations with or without third party products Use the Mac App Store and Apple's Volume Purchasing Program to deploy apps Leverage scripting techniques to reduce labor for the IT department Provide network services file sharing mobile home folders messaging etc to the Mac OS X clients Who This Book Is For System administrators and IT professionals who need to manage a large number of Mac OS X computers be they Mac OS X based servers or workstations The assumption is that readers are somewhat familiar with Mac OS X and or IT in general but not that they are familiar with the Apple system internals server services or deployment techniques
