Un/familiar Theology Susannah Cornwall, 2017-06-15 Through engagement with theologies of adoption pro natalism marriage and queer theology Susannah Cornwall figures developments in models of marriage and family not as distortions of or divergences from the divinely ordained blueprint but as developments already of a piece with these institutions being Much Christian theological discussion of family sex and marriage seems to claim that they are or should be unchanging and immaculate that to celebrate their shifting and developing natures is to reject them as good gifts of God However models of marriage family parenting and reproduction have changed and are still in some cases radically changing These changes are not all a raging tide to be turned back but in continuity with goods deeply embedded in the tradition Alternative forms of marriage and family stand as signs of the hope of the possibility of change Changed institutions such as same sex marriage are new beginnings with the potential to be fruitful and generative in their own right In them humans create new imaginaries which more fully acknowledge the interactive nature of our relationships with the world and the divine

From an Ethic of Sufficiency to its Policy and Practice in Late Capitalism Manu V. Mathai, Sylvia Lorek, Wolfgang Sachs, 2023-12-13 That the notion of sufficiency is essential for a good life is an idea that enjoys support across many ethical philosophical religious and cultural persuasions This notion reasserted itself in the study of sustainability once modern society reluctantly took cognizance of the limited low entropy energy and matter available for human appropriation There is today therefore a general recognition of i e not necessarily wide agreement on the merits of or needs for notions of sufficiency as a species of environmentalism within secular communities In this context a critical question that invites our attention is how to effect sufficiency and in particular

of dealing with the daunting challenge of injustice as well as questions of distribution within and between countries that it brings to attention. Given sufficiency's original home as it were in tradition, the modern world has tended to dismiss it or to plead to individual voluntary simplicity when faced with evidence asserting its necessity. Sufficiency is also often written away as a spiritual problem. The domain of ascetics and the religious. How to rehabilitate sufficiency in a political economy for the secular modern facing its biggest existential challenge yet in the form of the environmental crisis. Technological changes will bring both new advances in conducting analysis and new risks related to technologically based activities and communications around the world. Because these changes are virtually inevitable the Intelligence Community will need to make sustained collaboration with researchers in the social and behavioral sciences a key priority if it is to adapt to these changes in the most productive ways.
