Sustainable Freight Transport Lóri Tavasszy,M. Piecyk,2018-12-10 This book is a printed edition of the Special Issue Sustainable Freight Transport that was published in Sustainability

**Pro-active Dynamic Vehicle Routing** Francesco Ferrucci,2013-03-14 This book deals with transportation processes denoted as the Real time Distribution of Perishable Goods RDOPG The book presents three contributions that are made to the field of transportation First a model considering the minimization of customer inconvenience is formulated Second a pro active real time control approach is proposed Stochastic knowledge is generated from past request information by a new forecasting approach and is used in the pro active approach to guide vehicles to request likely areas before real requests arrive there Various computational results are presented to show that in many cases the pro active approach is able to achieve significantly improved results Moreover a measure for determining the structural quality of request data sets is also proposed The third contribution of this book is a method that is presented for considering driver inconvenience aspects which arise from vehicle en route diversion activities Specifically this method makes it possible to restrict the number of performed vehicle en route diversion activities

*Securing the Internet of Things: Concepts, Methodologies, Tools, and Applications* Management Association, Information Resources,2019-09-06 The ubiquity of modern technologies has allowed for increased connectivity between people and devices across the globe This connected infrastructure of networks creates numerous opportunities for applications and uses As the applications of the internet of things continue to progress so do the security concerns for this technology The study of threat prevention in the internet of things is necessary as security breaches in this field can ruin industries and lives Securing the Internet of Things Concepts Methodologies Tools and Applications is a vital reference source that examines recent developments and emerging trends in security and privacy for the internet of things through new models practical solutions and technological

advancements related to security Highlighting a range of topics such as cloud security threat detection and open source software this multi volume book is ideally designed for engineers IT consultants ICT procurement managers network system integrators infrastructure service providers researchers academics and professionals interested in current research on security practices pertaining to the internet of things *Cognitive Dependability Engineering* Lech Bukowski,2023-07-17 The work is a context oriented analysis and synthesis of complex engineered systems to ensure continuous and safe operations under conditions of uncertainty The book is divided in four parts the first one comprises an overview of the development of systems engineering starting with basics of Systems Science and Single Systems Engineering through System of Systems Engineering to Cognitive Systems Engineering The Cognitive Systems Engineering model was based on the concept of imperfect knowledge acquisition and management The second part shows the evolutionary character of the dependability concept over the last fifty years Beginning from simple models based on the classical probability theory through the concepts of tolerating faults as well as resilience engineering we come to the assumptions of Cognitive Dependability Engineering CDE based on the concept of continuous smart operation both under normal and abnormal conditions The subject of the next part is analysis and synthesis of Cyber Physical Social CPS Systems The methodology consists of the following steps modeling CPS systems structure simulating their behavior in changing conditions and in situations of disruptions and finally assessing the dependability of the entire system based on CDE The last part of the work answers the question of how to deal with risks in CPS systems in situations of high level of uncertainty The concept of a Cognitive Digital Twin was introduced to support the process of solving complex problems by experts and on this basis a framework for cognitive dependability based problemsolving in CPS Systems operating under deep uncertainty was developed The possibilities and purposefulness of using this framework have been demonstrated with three practical examples of disasters that have happened in the past and have been thoroughly analyzed **ICGR 2022 5th International Conference on Gender Research** Elisabeth Pereira,Carlos Costa,Zélia Breda,2022-04-28 [Innovations in Logistics and Supply Chain Management Technologies for Dynamic Economies](#) Luo, ZongWei,2012-03-31 This book disseminates supply chain management and applied logistic theories technology development innovation and transformation in various economy sectors upon current advancing technological opportunities and market imperatives Provided by publisher **Handbook on Digital Business Ecosystems** Baumann, Sabine,2022-04-22 This timely Handbook on Digital Business Ecosystems provides a comprehensive overview of current research and industrial applications as well as suggestions for future developments Multi disciplinary in scope the Handbook includes rigorously researched contributions from over 80 global expert authors from a variety of areas including administration and management economics computer science industrial engineering and media and communication **Best Practices for Online Procurement Auctions** Parente, Diane H.,2007-12-31 Offers a systematic approach to the examination of online procurement auctions Growth in online auctions reinforces the need for

understanding the factors important in auctions and the caveats that both researchers and practitioners need to know in order to effectively study and use the auction tool      **Reliable, Secure and Resilient Logistics Networks** Lech

Bukowski,2018-12-13 This book synthesizes the current state of knowledge on logistics infrastructures and process modeling especially for processes that are exposed to changing and uncertain environments It then builds on this knowledge to present a new concept of dependable product delivery assurance In order to quantitatively assess dependability a service continuity oriented approach as well as an imperfect knowledge based concept of risk are employed This approach is based on the methodology of service engineering and is closely related to the idea of the resilient enterprise as well as the concept of disruption tolerant operation The practical advantages of this concept are subsequently illustrated in three sample applications a modified FMECA method an expert system with fuzzy reasoning and a simulation agent based model of logistic network resilience The book will benefit a broad readership including researchers especially in systems science management science and operations research professionals especially managers project managers and analysts and undergraduate postgraduate and MBA students in engineering      *Advances in System Dynamics and Control* Azar, Ahmad

Taher,Vaidyanathan, Sundarapandian,2018-02-09 Complex systems are pervasive in many areas of science With the increasing requirement for high levels of system performance complex systems has become an important area of research due to its role in many industries *Advances in System Dynamics and Control* provides emerging research on the applications in the field of control and analysis for complex systems with a special emphasis on how to solve various control design and observer design problems nonlinear systems interconnected systems and singular systems Featuring coverage on a broad range of topics such as adaptive control artificial neural network and synchronization this book is an important resource for engineers professionals and researchers interested in applying new computational and mathematical tools for solving the complicated problems of mathematical modeling simulation and control      **Best Practices on Advanced Condition**

**Monitoring of Rail Infrastructure Systems** Stefano Bruni,Serdar Dindar,Sakdirat Kaewunruen,2022-03-14 This Research Topic eBook comprises Volume I and Volume II of *Best Practices on Advanced Condition Monitoring of Rail Infrastructure Systems*      *Frugal Innovation and the New Product Development Process* Stephanie B.M. Cadeddu,Jerome D.

Donovan,Cheree Topple,Gerrit A. de Waal,Eryadi K. Masli,2019-01-17 This book explores the new product development process of firms developing frugal innovation for the base of the pyramid BOP markets in developing countries Frugal innovations are products characterised by an affordable price point durability usability and core functionalities that are highly adapted to BOP consumers needs Frugal products have the potential to drive the development progress and living standards of low income consumers With an innovation framework developed from worldwide frugal case studies this book provides detailed insights through two in depth start up firms in Indonesia that have successfully launched frugal products for the low income market These two start ups have addressed two major development challenges for not just Indonesia but

also the global BOP market traditional methods of cooking and access to clean drinking water A detailed roadmap is developed from insights into the processes and management decisions of these two start ups and combined with previous studies on frugal products Providing a detailed roadmap across the different phases and stages of the new product development process when developing frugal products this book will be insightful to not only innovators but also investors and government agencies supporting their activities

*Nanoelectronics, Circuits and Communication Systems* Vijay Nath,J. K. Mandal,2020-04-01 This book features selected papers presented at the Fourth International Conference on Nanoelectronics Circuits and Communication Systems NCCS 2018 Covering topics such as MEMS and nanoelectronics wireless communications optical communications instrumentation signal processing the Internet of Things image processing bioengineering green energy hybrid vehicles environmental science weather forecasting cloud computing renewable energy RFID CMOS sensors actuators transducers telemetry systems embedded systems and sensor network applications in mines it offers a valuable resource for young scholars researchers and academics alike

**STAIRS 2012** Kristian Kersting,Marc Toussaint,2012 The field of Artificial Intelligence is one in which novel ideas and new and original perspectives are of more than usual importance The Starting AI Researchers Symposium STAIRS is an international meeting which supports AI researchers from all countries at the beginning of their career PhD students and those who have held a PhD for less than one year It offers doctoral students and young post doctoral AI fellows a unique and valuable opportunity to gain experience in presenting their work in a supportive scientific environment where they can obtain constructive feedback on the technical content of their work as well as advice on how to present it and where they can also establish contacts with the broader European AI research community This book presents revised versions of peer reviewed papers presented at the Sixth STAIRS which took place in Montpellier France in conjunction with the 20th European Conference on Artificial Intelligence ECAI and the Seventh Conference on Prestigious Applications of Intelligent Systems PAIS in August 2012 The topics covered in the book range over a broad spectrum of subjects in the field of AI machine learning and data mining constraint satisfaction problems and belief propagation logic and reasoning dialogue and multiagent systems and games and planning Offering a fascinating opportunity to glimpse the current work of the AI researchers of the future this book will be of interest to anyone whose work involves the use of artificial intelligence and intelligent systems
