Chinese Public Theology Alexander Chow,2018 It has been widely recognized that Christianity is the fastest growing religion in one of the last communist run countries of the world the People s Republic of China Yet it would be a mistake to describe Chinese Christianity as merely a clandestine faith or as hoped by the Communist Party of China a privatized religion Alexander Chow argues that Christians in mainland China have been constructing a more intentional public theology to engage the Chinese state and society since the end of the Cultural Revolution 1966-76 Chinese Public Theology recalls the events which have led to this transformation and examines the developments of Christianity across three generations of Chinese intellectuals from the state sanctioned Protestant church the secular academy and the growing urban renaissance in Calvinism Moreover Chow shows how each of these generations have provided different theological responses to the same sociopolitical moments of the last three decades This study illustrates how a growing understanding of Chinese public theology has been developed through a subconscious intermingling of Christian and Confucian understandings of public intellectualism These factors result in a contextually unique understanding of public theology but also one which is faced by contextual limitations as well With this in mind Chow draws from the Eastern Orthodox doctrine of theosis and the Chinese traditional teaching of the unity of Heaven and humanity Tian ren heyi to offer a way forward in the construction of a Chinese public theology

A Korean Theology of Human Nature Jung Sun Oh,2005-01-31 This remarkable study articulates a Korean Confucian Christian theory of human nature theory of justification sanctification and salvation by means of a reformed concept of filial piety The book investigates in depth the theological anthropology of Robert C Neville and the inclusive humanism of Tu Wei ming Neville and Tu represent contemporary Christian and Confucian approaches to religious anthropology Furthermore they have engaged in an extended and productive dialogical encounter on the themes of comparative thought and religious renewal in Asia and North America This book argues that Neville s and Tu s insights into human nature have great relevance for a comparative contemporary Korean theology by focusing on the role of a reformed version of filial piety as a new component of Korean theology The articulation of filial piety as a potential key of contemporary Korean theology is an example of creative appropriation of a Confucian theme of the Christian praxis of sanctification and

ultimately the soteriology of divine grace and transformation This study construes human nature to be such that any living theology will reflect the creative engagement of Christian theologians as public intellectuals in search of the articulation of the gospel

Nicene and Post-Nicene Fathers: First Series, Volume V St. Augustine: Anti-Pelagian Writings Philip Schaff, 2007-05-01 The Council of Nicaea in 325 AD marked the beginning of a new era in Christianity For the first time doctrines were organized into a single creed The Nicene and Post Nicene Fathers did most of their writing during and after this important event in Church history Unlike the previous era of Christian writing the Nicene and Post Nicene era is dominated by a few very important and prolific writers In Volume V of the 14 volume collected writings of the Nicenes and Post Nicenes first published between 1886 and 1889 readers will discover Saint Augustines rebuke of Pelagianism This doctrine undermined Augustines beliefs because it claimed that original sin did not exist Since there was no original sin humans were saved or lost based solely on their own will This further meant that Jesus while a great teacher and model human being did not die to save humanity negating a large portion of Christian doctrine Augustine believed that salvation was available only by the grace of God working in conjunction with mans decision to live a good life Spiritual seekers and students of history will find this work a thorough defense of Catholic theology
