On Guard Against the Red Menace Rodrigo Patto Sá Motta,2020-02-01 This book focuses on the values beliefs fears and actions of Brazilian groups that throughout the twentieth century fought the red menace It is based on broad and diversified documentary sources including police files archives of political leaders traditional press periodicals newspapers and brochures of right wing organizations monuments caricatures and photographs The work is a major contribution to better understanding the political impact of right wing movements in Brazil and the justifications made for the authoritarian coups of 1937 and 1964 The author explains the intricacy of the political movements leaderships and organizations that gathered around the fight against communism as well as the ideas and images used to disseminate their arguments including international sources of inspiration The argument presented is not one of mere condemnation but as dictatorship has reared its head post 1964 an assessment is long overdue in order to understand the political impact of anti communist movements which have contributed to enable the longstanding police military repressive machine of the Brazilian State The current return of anti communism to the Brazilian political scene is evidence of the book s thesis that this phenomenon took root in Brazilian society during the first decades of the twentieth century On Guard Against the Red Menace helps to understand why a candidate of military origin who promises to rid the country of the reds won the October 2018 elections in Brazil by adopting a discursive strategy that represents the appropriation of the anti communist tradition analyzed in this book

On Guard Milton Lipson, 1975 A descriptive analysis of the industry by a specialist in security and investigation The author begins by explaining why the industry is very much a product of its history tracing the sorting out over two centuries of private versus public police functions His analysis covers the principal categories of private security The typical uses and abuses of security guards are discussed Personnel and training practices are examined and criticized In background and experience fraud investigators are seen as contributing greatly to the reputation and effectiveness of the industry The armored car segment is generally effective with most losses due to failure by employees to follow prescribed procedures Need is seen for improved security equipment especially in alarm systems Lipson is most critical of the lack of private security legislation He concludes that there is a need for an institute for private security independent of the industry for research evaluation as a teaching facility and as an aid to congress in suggesting regulatory legislation
