Winchip,2011-10-10 Sustainable Design for Interior Environments 2nd Edition builds on the first edition s premise that the interior design profession has a social and moral responsibility to protect

the health safety and welfare of people and the environment The text equips professors students and practitioners to design sustainable interiors by addressing LEED certification environmental concerns ecosystems ethics values worldviews and the ways in which science and technology can be used to address environmental challenges Through content organization and pedagogical features the book integrates complex sustainability topics directly into the design process thereby enabling readers to apply the concepts of sustainability with the same ease as they do the elements and principles of design idea journal: interior technicity: unplugged and/or switched on Julieanna Preston, 2020-10-07 Interior Technicity Unplugged and or Switched On invites reflection on how interiors have always been augmenting entities and how they continue to be so in other words extending facilitating and consolidating bodies within socio cultural environments Rather than seeing an interior as an inside in opposition to a world beyond it asks what modes of folding inward have equipped and enabled the spatial environment Technicity the world of tools and technical objects that extend and mediate memory as Bernard Steigler 1998 describes it has never been what inside ness in its sheltering of life keeps at bay mediation is from the start technical indexed to inscribing practices rich in temporal and embodied implications By this reading interiors have always been augmented and augmenting in the sense of the Latinaugmentare to increase enlarge or enrich This IDEA Journal issue considers this mode of folding inward as a condition of an interior specificity Whether it be a small structure such as a tramping hut or a tiny house a large complex interior environment such as an airport or shopping mall handmade with local materials such as Samoan fale or the result of manufacturing processes assembling artificial and prefabricated elements as in the case of a spacecraft boat or train interiors are augmented mediated generated or embellished by technologies The effect of these technologies is not neutral one s experience of an interior is significantly influenced by the affective resonance of its technologies **Spatial Design Education** Ashraf M. Salama, 2016-03-09 Design education in architecture and allied disciplines is the cornerstone of design professions that contribute to shaping the built environment of the future In this book design education is dealt with as a paradigm whose evolutionary processes underpinning theories contents methods tools are questioned and critically examined It features a comprehensive discussion on design education with a focus on the design studio as the backbone of that education and the main forum for creative exploration and interaction and for knowledge acquisition assimilation and reproduction Through international and regional surveys the striking qualities of design pedagogy contemporary professional challenges and the associated sociocultural and environmental needs are identified Building on twenty five years of research and explorations into design pedagogy in architecture and urban design this book authoritatively offers a critical analysis of a continuously evolving profession its associated societal processes and the way in which design education reacts to their demands Matters that pertain to traditional pedagogy its characteristics and the reactions developed against it in the form of pioneering alternative studio teaching practices Advances in design approaches and methods are debated including critical inquiry empirical making process based learning and Community Design Design Build and Live Project Studios Innovative

teaching practices in lecture based and introductory design courses are identified and characterized including inquiry based active and experiential learning These investigations are all interwoven to elucidate a comprehensive understanding of contemporary design education in architecture and allied disciplines A wide spectrum of teaching approaches and methods is utilized to reveal a theory of a trans critical pedagogy that is conceptualized to shape a futuristic thinking about design teaching Lessons learned from techniques and mechanisms for accommodation adaptation and implementation of a trans critical pedagogy in education are conceived to invigorate a new student centered evidence based design culture sheltered in a wide variety of learning settings in architecture and beyond
