Modelling Web-based Learning Ecosystems for Aggregation and Reuse Kai Michael Höver,2015-04-28 In der E Learning Domäne bilden sowohl die Lernressourcen Lehrende und Lernende als auch die stattfindenden Lernprozesse in ihrer Gesamtheit Lernkosysteme Diese Dissertation untersucht die Modellierung von Lernkosystemen zur Unterstützung ihrer Aggregation und Wiederverwendung Zur Erreichung dieses Ziels müssen Modelle von Lernkosystemen die Aggregierbarkeit Austauschbarkeit Interoperabilität und granulare Wiederverwendbarkeit ihrer Daten unterstützen Auf Basis durchgeführter Nutzerstudien werden Konzepte digitaler Modelle von Lernkosystemen sogenannte LOOCs Linked Open Online Courses entwickelt Dabei werden insbesondere Technologien des Semantic Webs sowie Linked Data Konzepte betrachtet Die entwickelten ontologischen Modelle bilden die Basis für mehrere E Learning Applikationen welche die Tragf

higkeit der Konzepte sowie eine hohe Nutzerakzeptanz zeigen. Ferner wird ein formales Interpretermodell für CSCL Computer Supported Collaborative Learning Scripts zur Beschreibung von Lernprozessen, welches mit Hilfe von Abstract State Machines spezifiziert wurde, vorgestellt. In the e learning domain the learning resources, teachers and learners and the active learning processes in their entirety construct the learning ecosystems. This thesis examines the modelling of learning ecosystems to support their aggregation and reuse. To achieve this goal, learning ecosystem models must support aggregation, compatibility, interoperability and granular re-usability of their data. Through user studies, digital model concepts of learning ecosystems, i.e. so called LOOCs (linked open online courses), were developed. In particular, Semantic Web technologies and Linked Data concepts are considered within the context. The developed ontological models form the basis for a number of e learning applications that show the viability of the concepts as well as a high user acceptance. Further, a formal interpreter model for CSCL Computer Supported Collaborative Learning Scripts for the description of learning processes specified by using Abstract State Machines is presented.

**Advances in Web-Based Learning - ICWL 2010** Xiangfeng Luo, Marc Spaniol, Lizhe Wang, Qing Li, Wolfgang Nejdl, Wu Zhang, 2010-11-27. They deal with topics such as e learning platforms and tools, technology enhanced learning, web based learning for oriental languages, mobile situated e learning, learning resource deployment, organization and management, design model and framework of e learning systems, e learning metadata and standards, collaborative learning and game based learning, as well as practice and experience sharing and pedagogical issues.

**Collaborative Annotation for Reliable Natural Language Processing** Karën Fort, 2016-06-14. This book presents a unique opportunity for constructing a consistent image of collaborative manual annotation for Natural Language Processing (NLP). NLP has witnessed two major evolutions in the past 25 years: firstly, the extraordinary success of machine learning, which is now, for better or for worse, overwhelmingly dominant in the field; and secondly, the multiplication of evaluation campaigns or shared tasks. Both involve manually annotated corpora for the training and evaluation of the systems. These corpora have progressively become the hidden pillars of our domain, providing food for our hungry machine learning algorithms and reference for evaluation. Annotation is now the place where linguistics hides in NLP. However, manual annotation has largely been ignored for some time, and it has taken a while even for annotation guidelines to be recognized as essential. Although some efforts have been made lately to address some of the issues presented by manual annotation, there has still been little research done on the subject. This book aims to provide some useful insights into the subject. Manual corpus annotation is now at the heart of NLP and is still largely unexplored. There is a need for manual annotation engineering in the sense of a precisely formalized process, and this book aims to provide a first step towards a holistic methodology with a global view on annotation.
