from 2013 to 2017 under the auspices of the ELI and was conducted by Bob Wessels and Stephan Madaus who were assisted by Gert Jan Boon. The study sought to design elements of a legal framework that will enable the further development of coherent and functional rules for business rescue in Europe. This includes certain statutory procedures that could better enable parties to negotiate solutions where a business becomes financially distressed. Such a framework also includes rules to determine in which procedures and under which conditions an enforceable solution can be imposed upon creditors and other stakeholders despite their lack of consent. The project had a broad scope and extended to consider frameworks that can be used by non financial businesses out of court and in a pre insolvency context. Part I of this book the ELI Instrument as approved by the ELI Council and General Assembly features 115 recommendations on a wide variety of themes affected by the rescue of financially distressed businesses such as the legal rules for professions and courts treatment and ranking of creditors claims contract corporate and labour law as well as laws relating to transaction avoidance. Part II consists of national reports that sketch the legal landscape in 13 States and of an Inventory Report on International Recommendations from Standard Setting Organisations both of which provided insight for the drafting of the Instrument. This volume is designed to assist those involved in a process of law reform and those setting standards for soft law in the business rescue context.

**International Careers and Academia** C. K. Noble, 2025-02-04 While the topic of international careers and academia has received significant interest the real contextual opportunities and barriers remain hidden by a dreadful reality across countries contexts and international virtual spaces in greater numbers than ever before. This book integrates current debates of exposure to diversity and multiculturalism with different perspectives from authors with academic affiliations in 14 countries. It covers topics on intellectual language and cultural diversity and offers a theory for the global value chain of academia and for the careers of international scientists. The aim is to achieve a holistic transformation with several possible courses of action useful to all involved in academia. The book also provides an overview of international scientific careers across different career stages based on lived experiences. This type of international geographical mobility needs more than supportive host institutions and requires international networks and relationships of trust. The book is a must read for all involved in diversity and multiculturalism in higher education in different countries. It provides important insights to those engaged in academia and in international careers as scientists.
