Online Ethics Intelligence New Framework:

Intelligence Elites and Public Accountability Vian Bakir, 2018-04-17 This book provides a definitive overview of the relationships of influence between civil society and intelligence elites The secrecy surrounding intelligence means that publication of intelligence is highly restricted barring occasional whistle blowing and sanitised official leaks These characteristics mean that intelligence if publicised can be highly manipulated by intelligence elites while civil society's ability to assess and verify claims is compromised by absence of independent evidence There are few studies on the relationship between civil society and intelligence elites which makes it hard to form robust assessments or practical recommendations regarding public oversight of intelligence elites Addressing that lacuna this book analyses two case studies of global political significance The intelligence practices they focus on contemporary mass surveillance and Bush era torture intelligence policies have been presented as vital in fighting the Global War on Terror enmeshing governments of scores of nation states while challenging internationally established human rights to privacy and to freedom from torture and enforced disappearance The book aims to synthesise what is known on relationships of influence between civil society and intelligence elites It moves away from disciplinary silos to make original recommendations for how a variety of academic disciplines most likely to study the relationship between civil society and intelligence elites international relations history journalism and media could productively cross fertilise Finally it aims to create a practical benchmark to enable civil society to better hold intelligence elites publicly accountable This book will be of great interest to students of intelligence studies surveillance media journalism civil society democracy and IR in general

Technology and the Intelligence Community Margaret E. Kosal, 2018-03-19 This volume examines the role of technology in gathering assimilating and utilizing intelligence information through the ages Pushing the boundaries of existing works the articles contained here take a broad view of the use and implementation of technology and intelligence procedures during the cold war era and the space race the September 2011 attacks and more recent cyber operations It looks at the development of different technologies procedural implications

thereof and the underlying legal and ethical implications The findings are then used to explore the future trends in technology including cyber operations big data open source intelligence smart cities and augmented reality Starting from the core aspects of technical capabilities the articles dig deeper exploring the hard and soft infrastructure of intelligence gathering procedures and focusing on the human and bureaucratic procedures involved therein Technology and innovation have played an important role in determining the course of development of the intelligence community Intelligence gathering for national security however is not limited only to the thread of technical capabilities but is a complex fabric of organizational structures systemic undercurrents and the role of personnel in key positions of decision making The book's findings and conclusions encompass not just temporal variation but also cut across a diverse set of issue areas This compilation is uniquely placed in the interdisciplinary space combining the lessons from key cases in the past to current developments and implementation of technology options *Intelligence Leadership and Governance* Patrick F.

Walsh, 2020-11-22 This book explores the challenges leaders in intelligence communities face in an increasingly complex security environment and how to develop future leaders to deal with these issues As the security and policy making environment becomes increasingly complicated for decision makers the focus on intelligence agencies to deliver more value will increase This book is the first extensive exploration of contemporary leadership in the context of intelligence agencies principally in the Five Eyes nations i.e. Australia United States United Kingdom Canada and New Zealand It provides a grounded theoretical approach to building practitioner and researcher understanding of what individual and organisational factors result in better leadership Using interviews from former senior intelligence leaders and a survey of 208 current and former intelligence leaders the work explores the key challenges that leaders will likely face in the twenty first century and how to address these It also explores what principles are most likely to be important in developing future leaders of intelligence agencies in the future This book will be of much interest to students of intelligence studies strategic studies leadership studies security studies and international relations **Hacker, Influencer, Faker, Spy** Robert

Dover, 2022-10-31 Intelligence agencies are reflections of the societies they serve No surprise then that modern spies and the agencies they work for are fixated on the internet and electronic communications These same officials also struggle with notions of privacy appropriateness national boundaries and the problem of disinformation They are citizens of both somewhere and nowhere serving a national public yet confronting spies who operate across borders These adversaries are utilising new technologies that offer a transnational anonymity Meanwhile ordinary people are keen to be protected from threats but equally keen basing their understanding of intelligence on news and popular culture to avoid over reach by authorities believed to have near God like powers This is the new operating environment for spies a heady mix of rapid technological development identity politics plausible deniability uncertainty and distrust of authority *Hacker Influencer Faker Spy* explores both the challenges spies face from these digital horizons and the challenges citizens face in understanding

what spies do and how it impacts on them Robert Dover makes a radical case for overhauling intelligence to capitalise on open source information shrinking the secret state whilst still supporting the functioning of modern governments in the post COVID age
