The Internet of Drones Arun Solanki, Sandhya Tarar, Simar Preet Singh, Akash Tayal, 2022-11-03 In recent years drones have been integrated with the Internet of Things to offer a variety of exciting new applications Here is a detailed exploration of adapting and implementing Internet of Drones technologies in real world applications emphasizing solutions to architectural challenges and providing a clear overview of standardization and regulation implementation plans and privacy concerns The book discusses the architectures and protocols for drone communications implementing and deploying of 5G drone setups security issues deep learning techniques applied on real time footage and more It also explores some of the varied applications such as for monitoring and analysis of troposphere pollutants providing services and communications in smart cities such as for weather forecasting communications transport safety and protection for disaster relief management for agricultural crop monitoring and more Optimal Localization of Internet of Things Nodes Sheetal N Ghorpade, Marco Zennaro, Bharat S Chaudhari, 2021-11-16 This book is a practical resource for designing Internet of Things IoT networks and implementing IoT applications from the localization perspective With the emergence of IoT machine to machine communication Industrial IoT and other societal applications many applications require knowledge of the exact location of mobile IoT nodes in real time As the IoT nodes have computational and energy limitations it is a crucial research challenge to optimize the network s performance with the highest localization accuracy Many researchers are working towards such localization problems However there is no single book available for the detailed study on IoT node localization This book provides one stop multidisciplinary solutions for IoT node localization design requirements challenges constraints available techniques comparison related applications and future directions Special features included are theory supported by algorithmic development treatment of optimization techniques and applications **Applications of Artificial Intelligence Techniques in Industry 4.0** Aydin Azizi, 2018-09-25 This book is to presents and evaluates a way of modelling and optimizing nonlinear RFID Network Planning RNP problems using artificial intelligence techniques It uses Artificial Neural Network models ANN to bind together the computational artificial intelligence algorithm with knowledge representation an efficient artificial intelligence paradigm to model and optimize RFID networks This effort leads to proposing a novel artificial intelligence algorithm which has been named hybrid artificial intelligence optimization technique to perform optimization of RNP as a hard learning problem This hybrid optimization technique consists of two different optimization phases First phase is optimizing RNP by Redundant Antenna Elimination RAE algorithm and the second phase which completes RNP optimization process is Ring Probabilistic Logic Neural Networks RPLNN The hybrid paradigm is explored using a flexible manufacturing system FMS and the results are compared with well known evolutionary optimization technique namely Genetic Algorithm GA to demonstrate the feasibility of the proposed architecture successfully **IT Application for Sustainable Living 2** Tajul Adli Abdul Razak, Ahmad Kamal Ismail, Andreas Öchsner, 2025-09-30 This book collectively aims

to enhance operational efficiency reduce environmental impact and drive technological progress across industries In today s fast paced and competitive business landscape industries are grappling with challenges in process optimization energy efficiency and transportation Effective management of these areas is essential for boosting productivity while minimizing waste and fostering sustainable growth for future business This collection of research and development projects highlights innovative solutions across various sectors including electric vehicle performance optimization smart agriculture healthcare monitoring and industrial maintenance Key focuses include electric vehicle motor and battery technology advancements driver safety systems IoT based vehicle surveillance and energy efficient charging solutions Additionally cutting edge applications like Li Fi for vehicle to vehicle data transfer and AI driven auto sorting systems demonstrate the integration of modern technology to address real world challenges

Policy Implications of Autonomous Vehicles, 2020-07-24 Policy Implications of Autonomous Vehicles Volume Five in the Advances in Transport Policy and Planning series systematically reviews policy relevant implications of AVs and the associated possible policy responses and discusses future avenues for policy making and research It comprises 13 chapters discussing a short term implications of AVs for traffic flow human automated bus systems interaction cyber security and safety cybersecurity certification and auditing non commuting journeys b long term implications of AVs for carbon dioxide CO2 emissions and energy health and well being data protection ethics governance c implications of AVs for the maritime industry and urban deliveries and d overall synthesis and conclusions Provides the authority and expertise of leading contributors from an international board of authors Presents the latest release in the Advances in Transport Policy and Planning series Updated release includes the latest information on the policy implications of autonomous vehicles

Advanced Applications of Blockchain Technology Shiho Kim,Ganesh Chandra Deka,2019-09-24 This contributed volume discusses diverse topics to demystify the rapidly emerging and evolving blockchain technology the emergence of integrated platforms and hosted third party tools and the development of decentralized applications for various business domains It presents various applications that are helpful for research scholars and scientists who are working toward identifying and pinpointing the potential of as well as the hindrances to this technology

IT Applications for Sustainable Living Muhamad Husaini Abu Bakar,Tajul Adli Abdul Razak,Andreas Öchsner,2023-08-27 The Internet of Things IoT has emerged as a new paradigm that connects the physical world with the digital world It is a network of interconnected devices sensors and objects that can communicate with each other collect and exchange data and perform various tasks without human intervention The IoT has the potential to revolutionize various industries such as healthcare transportation manufacturing and agriculture by enabling real time monitoring automation and optimization of processes This book is a collection of research manuscripts that explores the latest developments in smart technologies for sustainable living with reference to the IoT landscape including its architecture applications and challenges The research covers a wide range of topics including character segmentation recognition and classification deep learning

smart home earthquake early warning system wireless sensor network embedded RFID system and many more It also discusses various IoT platforms protocols and standards that are being developed to enable seamless integration and interoperability of IoT devices and services The research book aims to become a valuable resource for researchers practitioners and policymakers interested in smart technologies and sustainable living

Processing of Biomass Waste

Angana Sarkar,Ulla Lassi,2024-04-25 Processing of Biomass Waste Technological Upgradation and Advancement focuses on the exploitation of various waste management technologies and their associated process microbial chemical physical as tools to simultaneously generate value during treatment processes including degradation detoxification stabilization toxic and hazardous contaminants The book explores wastes as a veritable resource for wealth creation with particular focus on resources recoverable from diverse wastes using special intervention of biotechnological tools Other sections highlight recent technologies of waste bioprocessing in biorefinery approaches and enlighten on different approaches The book encompasses advanced and updated information as well as future directions for young researchers and scientists who are working in the field of waste management with a focus on sustainable value generation Includes cutting edge technologies in waste bioprocessing Focuses on applications of molecular biotechnological tools in waste bioprocessing Provides natural and eco friendly solutions to deal with the problem of pollution aiming value generation Details underlying mechanisms of waste bioprocessing approaches that cover microbes for the simultaneous value generation and removal of emerging contaminants Includes field studies on the application of biorefinery approach for eco restoration of contaminated sites Presents recent advances and challenges in waste bioprocessing research and applications for sustainable development

Antenna Design

Challenges and Future Directions for Modern Transportation Market Moh Chuan Tan,Minghui Li,Qammer H.

Abbasi,Muhammad Ali Imran,2020-10-26 This book is focused on wireless infrastructure deployment in modern transportation markets where the wireless infrastructure co exists with the existing structure It details the challenges this deployment may face and explores the mitigation measures to overcome the challenges The book proposes a smart antenna structure to overcome airspace congestion which improves the overall wireless performance and deployment cost With the combination of practical know how and theoretical estimation this book provides insight on how the modern smart antenna techniques that support most cutting edge wireless technology can be adopted into the existing infrastructure whilst minimising the distraction to the existing system This book is suitable for industrial and academic researchers practising engineers within the field of smart antennae and wireless infrastructure designers and developers

Proceedings of

Tenth International Congress on Information and Communication Technology Xin-She Yang,R. Simon

Sherratt,Nilanjana Dey,Amit Joshi,2025-09-26 This book gathers selected high quality research papers presented at the Tenth International Congress on Information and Communication Technology ICICT 2025 held in London on February 18 21 2025 It discusses emerging topics pertaining to information and communication technology ICT for managerial applications e

governance e agriculture e education and computing technologies the Internet of Things IoT and e mining Written by respected experts and researchers working on ICT the book offers an asset for young researchers involved in advanced studies The work is presented in ten volumes *Production Management, Manufacturing, and Process Control* Beata Mrugalska,Waldemar Karwowski,Tareq Z. Ahram,2024-10-09 Drawing on contributions from various manufacturing fields this book offers a comprehensive perspective by combining theoretical concepts with practical applications It emphasizes future developments the integration of technologies and the crucial role of humans in manufacturing companies Production Management Manufacturing and Process Control presents cutting edge strategies and innovations for creating people centered manufacturing processes It explores how culture influences cognition and behavior providing readers with valuable insights into relevant theories This book also explores risk management human performance improvement and the current challenges in quality and information systems management Sustainable global manufacturing practices that balance global market access with strong domestic engineering ecosystems are covered in detail and this book also addresses the optimization of production processes including the use of machine learning for fault diagnosis This is an ideal read and a valuable resource for students graduates teachers researchers and professionals in industrial management business management safety fields manufacturing risk management and quality management **Intelligent Systems** Siba Kumar Udgata,Srinivas Sethi,George Ghinea,Sanjay Kumar Kuanar,2025-01-17 This book features best selected research papers presented at the Fourth International Conference on Machine Learning Internet of Things and Big Data ICMIB 2024 held at GIET University Gunupur India during 8 10 April 2024 It comprises high quality research work by academicians and industrial experts in the field of machine learning mobile computing natural language processing fuzzy computing green computing human computer interaction information retrieval intelligent control data mining and knowledge discovery evolutionary computing IoT and applications in smart environments smart health smart city wireless networks big data cloud computing business intelligence Internet security pattern recognition predictive analytics applications in health care sensor networks and social sensing and statistical analysis of search techniques Low Voltage Power MOSFETs Jacek Korec,2011-03-30 Low Voltage Power MOSFETs focuses on the design of low voltage power MOSFETs and the relation between the device structure and the performance of a power MOSFET used as a switch in power management applications This SpringerBriefs close the gap between detailed engineering reference books and the numerous technical papers on the subject of power MOSFETs The material presented covers low voltage applications extending from battery operated portable electronics through point of load converters internet infrastructure automotive applications to personal computers and server computers The issues treated in this volume are explained qualitatively using schematic illustrations making the discussion easy to follow for all prospective readers Recent Trends in Healthcare Innovation Gururaj H L,Francesco Flammini,Ravi Kumar V,Prema N S,2025-04-18 The proceedings of the Annual International Conference on Recent Trends in Healthcare

Innovation AICRTHI 2024 is a compilation of groundbreaking research and advancements in healthcare technology artificial intelligence and collaborative healthcare solutions It serves as a comprehensive reference guide for emerging trends and challenges in modern healthcare innovation Drawing on research contributions from experts in academia industry and healthcare institutions worldwide this volume highlights technological breakthroughs in medicine their implications for patient care and their potential to reshape the future of global healthcare It explores collaborative frameworks between technology providers and healthcare practitioners to address pressing healthcare challenges and improve overall public health outcomes The peer reviewed papers contained in this book address critical themes in healthcare innovation with a focus on integration of artificial intelligence and machine learning in medical diagnostics advancements in telemedicine and wearable technologies innovations in public health and epidemiology sustainable healthcare practices This is a valuable resource for healthcare professionals researchers academics and students specializing in healthcare innovation biomedical engineering and public health It is also ideal for policymakers technologists and industry leaders interested in leveraging emerging technologies for enhanced healthcare delivery

The Impact of the Energy Dependency on Critical Infrastructure Protection Tünde Anna Kovács,Róbert Gábor Stadler,Norbert Daruka,2025-03-05 This book presents cutting edge research on the impact of energy dependence and strategies to mitigate it As a crucial component of critical infrastructure energy security is a top priority for nations worldwide The protection of this infrastructure along with the latest research tools and methodologies is of significant interest to both policymakers and industry leaders The book delves into two primary areas of research cybersecurity and physical security summarizing the latest findings in these critical fields The papers in this volume offer valuable insights for both academic and industrial audiences addressing the pressing challenges of energy security Energy is integral to every aspect of our daily lives Our comfort as well as our safety hinges on the uninterrupted supply of energy Recent global events particularly the Russian Ukrainian war have underscored the vulnerability of nations lacking sufficient energy resources Europe s energy supply has been severely disrupted by sanctions highlighting the need for energy resilience However this crisis has also accelerated the adoption of renewable energy sources marking a pivotal shift towards sustainable energy solutions

European Perspectives on Innovation Management Rob Dekkers,Laure Morel,2023-12-30 This book covers European perspectives on innovation management including new product and service development due to the inherent variety of socio economic perspectives and institutional settings in Europe The numerous settings and differing perspectives explored in the chapters exemplify diversity which ultimately leads to enhancing innovation Understanding such unique approaches will enable companies universities and other actors to more effectively create innovative products and services and policy makers to effectively stimulate growth and innovation The fragmented distributed economies in Europe also put a strong focus on internationalisation including innovation management new product and service development even within the internally open market of the European

Economic Area European Perspectives on Innovation Management will be of help to researchers managers entrepreneurs practitioners and students working on innovation management and practices embedded in national and regional innovation systems thus fostering a more innovative Europe

Self-powered Energy Harvesting Systems for Health Supervising Applications Albert Álvarez-Carulla, Jordi Colomer-Farrarons, Pere Lluís Miribel Català, 2022-09-29 This book highlights the current and recent state of the art developments in energy harvesting systems for health supervising applications It explores the exciting potential of energy harvesting as a crosscutting field of research to intersect with other areas to envisage new products solutions and applications Among all these new opportunities for synergy there is a research area that fully matches the features offered by energy harvesting with its power supply s main needs health supervising HS which consists of monitoring the health or operating conditions of anything such as structures buildings public health environment etc The book covers the hand in hand evolution towards a new paradigm truly self powered devices based on a single transducer acting as a sensor and as power source simultaneously and efficiently This evolution is illustrated by the concept and implementation of novel state of the art architecture for self powered energy harvesting systems for applications that range from structural health monitoring to point of care medical devices

Understanding COVID-19: The Role of Computational Intelligence Janmenjoy Nayak, Bighnaraj Naik, Ajith Abraham, 2021-07-27 This book provides a comprehensive description of the novel coronavirus infection spread analysis and related challenges for the effective combat and treatment With a detailed discussion on the nature of transmission of COVID 19 few other important aspects such as disease symptoms clinical application of radiomics image analysis antibody treatments risk analysis drug discovery emotion and sentiment analysis virus infection and fatality prediction are highlighted The main focus is laid on different issues and futuristic challenges of computational intelligence techniques in solving and identifying the solutions for COVID 19 The book drops radiance on the reasons for the growing profusion and complexity of data in this sector Further the book helps to focus on further research challenges and directions of COVID 19 for the practitioners as well as researchers

Industry 4.0 Value Roadmap Tuğrul U. Daim, Zahra Faili, 2019-10-22 Industry 4 0 has altered as well as disrupted the business model of organizations around the world The adoption however has been slow in the various industries as a clear roadmap for the integration of the same lacks in project planning This brief fills this gap as it examines the development of a Value Roadmap for different industries using Industry 4 0 as an enabler Using the automotive healthcare and telecommunication industries as case studies the authors create the value roadmap using five factors market drivers product features technology features enablers and resources This framework integrates both technology and market knowledge to support strategy development innovation and operational processes in organizations
