Innovation is often understood exclusively in terms of the economy but it is definitely a result of human labour and ingenuity and of the relationships among individuals and social groups Some societies and governmental structures are clearly more successful than others they act in divergent ways fostering innovation and employment and they utilize varied opportunities from different fields of research from new products and from their educational systems Thus innovation varies fundamentally between countries and public policies in matters such as energy technology environmental technologies facing climate change and advancing conditions of life can be determined according to different societies needs This volume brings together a range of world experts to compare countries and continents and help develop a fuller picture of innovations and their social basis It will be of interest to researchers in regional studies and economics as well as labour unions practitioners and policy makers **Future Politics** Jamie Susskind, 2018-09-12

Future Politics confronts one of the most important questions of our time how will digital technology transform politics and society The great political debate of the last century was about how much of our collective life should be determined by the state and what should be left to the market and civil society In the future the question will be how far our lives should be directed and controlled by powerful digital systems and on what terms Jamie Susskind argues that rapid and relentless innovation in a range of technologies from artificial intelligence to virtual reality will transform the way we live together Calling for a fundamental change in the way we think about politics he describes a world in which certain technologies and platforms and those who control them come to hold great power over us Some will gather data about our lives causing us to avoid conduct perceived as shameful sinful or wrong Others will filter our perception of the world choosing what we know shaping what we think affecting how we feel and guiding how we act Still others will force us to behave certain ways like self driving cars that refuse to drive over the speed limit Those who control

these technologies usually big tech firms and the state will increasingly control us They will set the limits of our liberty decreeing what we may do and what is forbidden Their algorithms will resolve vital questions of social justice allocating social goods and sorting us into hierarchies of status and esteem They will decide the future of democracy causing it to flourish or decay A groundbreaking work of political analysis Future Politics challenges readers to rethink what it means to be free or equal what it means to have power or property what it means for a political system to be just or democratic and proposes ways in which we can and must regain control
