Strengthening the Connections between Leadership and Learning John MacBeath, Neil Dempster, David Frost, Greer Johnson, Sue Swaffield, 2018-03-09 Examining a decade of research and practice this book makes the case for a radical reappraisal of leadership learning and their interrelationship in educational policy Discussing whether policy direction is progressively constraining the professionalism and initiative of teachers and school leaders it challenges conventional understanding and argues the case for thinking differently about the way to lead learning Based on the Leadership for Learning LfL Project the book clarifies extends and refines LfL principles and practices and their contribution to ameliorating some of the difficult conditions encountered in the contemporary educational policy environment It starts by discussing the direction and influence of current education policy and its subsequent consequences chapters then move on to explore the framing values informing the LfL Projects particularly focusing on what they imply for commitments to social justice children s rights and breadth in student learning and considering how to create favourable conditions for learning Identifying a disconnect between seminal principles and the nature of day to day practice Strengthening the Connections between Leadership and Learning challenges school policy and practice at national and local levels It is an essential read for postgraduate students especially those studying leadership in education as well as for teachers and policymakers in schools

Negotiating Neoliberalism Tim Rudd, Ivor F. Goodson, 2017-01-28 Following the financial crises in 2007 we have seen the intensification of neoliberal policies in education with radical and potentially irrevocable shifts in the educational landscape promoted under the auspices of austerity This book highlights the central features of neoliberal education policies their origins recent developments and also their inherent weaknesses and flaws It provides insights into the day to day realities and negative impacts of recent policies on the professional practice and work of educators demonstrating how the

changing conditions have led to de professionalisation alienation and a loss of professional autonomy and identity The book also provides a set of accounts that detail the new realities emerging as a result of austerity policies and questions the degree to which austerity has actually been developed as an ideological cover story for the further monetisation and privatisation of public services The various chapters challenge the common assumption that the neoliberal project is a monolithic orthodoxy by highlighting its complexities variations and contradictions in the ways policies are refracted through action and practice in different contexts The book also challenges the common assumption that there are no viable alternatives to neoliberal education policies and does so by presenting a range of different examples theoretical perspectives discourses and alternative practices It is argued that such alternatives not only highlight the range of different approaches choices and possibilities but also provide the seedbed for a reimagined educational future The authors offer a range of conceptual and theoretical insights and analyses that highlight the weaknesses and limitations inherent within the neoliberal education project and also illustrate the dangers in following the prevailing hegemonic discourse and trajectories It is postulated that alternative educational approaches warrant greater and urgent attention because history suggests that rather than having weathered the recent economic crisis we may well be witnessing the long tail of decline for the neoliberal project This book will be useful for educators researchers students and policy makers interested in the detrimental effects of neoliberal education the range of viable alternatives and the routes to resistance and ways of reimagining alternative educational futures

The book publishing industry is going through a period of profound and turbulent change brought about in part by the digital revolution What is the role of the book in an age preoccupied with computers and the internet How has the book publishing industry been transformed by the economic and technological upheavals of recent years and how is it likely to change in the future This is the first major study of the book publishing industry in Britain and the United States for more than two decades Thompson focuses on academic and higher education publishing and analyses the evolution of these sectors from 1980 to the present He shows that each sector is characterized by its own distinctive logic or dynamic of change and that by reconstructing this logic we can understand the problems challenges and opportunities faced by publishing firms today He also shows that the digital revolution has had and continues to have a profound impact on the book publishing business although the real impact of this revolution has little to do with the ebook scenarios imagined by many commentators Books in the Digital Age will become a standard work on the publishing industry at the beginning of the 21st century It will be of great interest to students taking courses in the sociology of culture media and cultural studies and publishing It will also be of great value to professionals in the publishing industry educators and policy makers and to anyone interested in books and their future

a wider ambivalence about the legacy of the Sixties *Teaching and Learning* Alex Moore, 2012 *Teaching and Learning Pedagogy Curriculum and Culture* is designed to share important theory with readers in an accessible but sophisticated way. It offers an overview of the key issues and dominant theories of teaching and learning as they impact upon the practice of education professionals in the classroom. This second edition has been updated to take account of significant changes in the field: young people's use of digital technologies, the increasing involvement of world of business in state education and ongoing high profile debates about assessment to name but a few. It examines the global move from traditional subject and knowledge based curricula towards skills and problem solving and discusses how the emphasis on education for citizenship has forced us to reconsider the social functions of education. Central topics also covered include an assessment of the most influential theorists of learning and teaching, the ways in which public educational policy impinges on local practice, the nature and role of language and culture in formal educational settings, an assessment of different models of good teaching, alternative models of curriculum and pedagogy. With questions, points for consideration and ideas for further reading and research throughout, this book delivers discussion and analysis designed to support understanding of classroom interactions and to contribute to improved practice. It will be essential reading for all student teachers, those engaged in professional development and Education Studies students.

Hearings, Reports and Prints of the House Committee on Education and Labor United States. Congress. House. Committee on Education and Labor, 1971 Student Voice and School Governance Marc Brasof, 2015-06-05. While student voice has been well defined in research, how to sustain youth adult leadership work is less understood. Students are rarely invited to lead school reform efforts and when they are, their voice is silenced by the structural arrangements and socio cultural conditions found in schools. This volume investigates problems with the neoliberal school reform movement and how youth adult partnerships have resulted in more effective reforms within schools and community organizations nationally and internationally. Stemming from an eight year ethnographic study at a civic themed public high school, the volume highlights the process of creating a school governance structure which produces active and informed citizens. Made up of executive, legislative and judicial branches, the program gives students the power to make, implement and review school policies and practices, a model that has found to effectively distribute leadership and trigger organizational learning and is thus at the forefront of civic education.
