**Reading for Evidence and Interpreting Visualizations in Mathematics and Science Education** Stephen P. Norris,2012-09-17 CRYSTAL Alberta was established to research ways to improve students understanding and reasoning in science and mathematics To accomplish this goal faculty members in Education Science and Engineering as well as school teachers joined forces to produce a resource bank of innovative and tested instructional materials that are transforming teaching in the K 12 classroom Many of the instructional materials cross traditional disciplinary boundaries and explore contemporary topics such as global climate change and the spread of the West Nile virus Combined with an emphasis

on the use of visualizations the instructional materials improve students engagement with science and mathematics  
Participation in the CRYSTAL Alberta project has changed the way I think about the connection between what I do as a researcher and what I do as a teacher I have learned how to better translate scientific knowledge into language and activities appropriate for students thereby transforming my own teaching I also have learned to make better connections between what students are learning and what is happening in their lives and the world thereby increasing students interest in the subject and enriching their learning experience      *The Cumulative Book Index* ,1986 A world list of books in the English language      Books and Pamphlets, Including Serials and Contributions to Periodicals Library of Congress.
