Media Events In Web 2.0 China Interventions Of Online Activism:

Media Events in Web 2.0 China Dr Jian Xu PhD, 2015-12-15 This book is among the first to use a media events framework to examine China's Internet activism and politics and the first study of the transformation of China's media events through the parameter of online activism. The author locates the practices of major modes of online activism in China: shanzhai culture, jamming, citizen journalism, and weiguan-mediated mobilisation into different types of Chinese media events: ritual celebration, natural disaster, political scandal. The contextualised analysis of online activism thus enables exploration of the spatial, temporal, and relational dimensions of Chinese online activism with other social agents such as the Party state, mainstream media, and civil society. Analysis reveals Internet politics in China on three interrelated levels: the individual, the discursive, and the institutional. Contemporary cases rich in empirical research data and interdisciplinary theory demonstrate that the alternative and activist use of the Internet has intervened into and transformed conventional Chinese media events in various types of agents, their agendas, and performances, and the subsequent and corresponding political impact. The Party market-controlled Chinese media events have become more open, contentious, and deliberative in the Web 2.0 era due to the active participation of ordinary Chinese people aided by the Internet. Media Activism in the Digital Age Victor

Pickard, Guobin Yang, 2017-07-06 Media Activism is the first collection of its kind to explore the political economy of social movements, the aesthetic styles, and cultural forms of mediated political expressions, and the patterns of longer-term historical change in the forms and tactics of activism. From memes to zines, hacktivism to artivism, this book considers activist practices involving both older kinds of media alongside newer digital, social, and network-based forms. The book provides fascinating case studies of activists using media to make political interventions in different historical periods and at local, national, and global levels. *Digital Citizenship in China* Jun Fu, 2021-09-20 This book examines how emerging forms of citizenship are shaped by young people in digital spaces as a way of making sense of contemporary Chinese society, forming new identities, and negotiating social and political participation. By focusing on Chinese young adults' everyday online practices, the book offers a unique treatment of the topic of young people and the Chinese Internet that navigates between the dominant focus on censorship on the one hand and protest and politicized action on the other. The book brings the focus of research from highly visible or spectacular forms of collectivity, belonging, and identification exhibited in young people's online practices to young people's everyday social and cultural engagement through new media. It brings new insights by understanding the meanings of young people's mundane and everyday online engagement for their citizenship, learning, identity performance, and their formation of political subjectivity. Readers will gain insights into citizenship in China and young people and the Chinese Internet.

The Evolution of the Chinese Internet Shaohua Guo, 2020-12-15 Despite widespread consensus that China's digital revolution was sure to bring about massive democratic reforms, such changes have not come to pass. While scholars and policy makers alternate between predicting change and disparaging a stubbornly authoritarian regime, in this book Shaohua Guo demonstrates how this dichotomy misses the far more complex reality. *The Evolution of the Chinese Internet* traces the emergence and maturation of one of the most creative digital cultures in the world through four major technological platforms: the bulletin board system, the blog, the microblog and WeChat. Guo transcends typical binaries of freedom and control to argue that Chinese Internet culture displays a uniquely sophisticated interplay between multiple extremes and that its vibrancy is dependent on these complex negotiations. In contrast to the flourishing of research findings on what is made invisible online, this book examines the driving mechanisms that grant visibility to particular kinds of user-generated content. Offering a systematic account of how and why an ingenious Internet culture has been able to thrive, Guo highlights the pivotal roles that media institutions

technological platforms and creative practices of Chinese netizens have played in shaping culture on and offline
