Gammage, 1963 Police Training , 1963 *Andragogical Instruction for Effective Police Training* Robert F. Vodde, 2009 This book details a 2 year study that examined and compared the efficacy of an andragogical instructional methodology to that of a traditional prescriptive pedagogical and militaristic format of basic police training The study not only revealed that an andragogical approach yielded greater outcomes in terms of skills and competencies but was preferred among recruits in great part due to the emphasis placed on experiential learning and a collegiate and collaborative approach to learning In his research Robert F Vodde identified six thematic categorical constructs by which basic police training programs can be organized and administered to include the importance for not only working within a quasi military hierarchal organizational structure but in preparing recruits for the emotional and physical challenges associated with police work When properly administered an andragogical approach represents a well planned and skillfully orchestrated process that holistically integrates all aspects of the curriculum one that capitalizes on the use of multi sensory experiential hands on learning activities that allow recruits to apply what they have learned Considering the short and long term impacts of basic police training Vodde illuminates in this book that an andragogical instructional methodology serves as a pragmatic effective and responsive approach to training it is one that creates a physical and psychological climate that takes into consideration the affective needs of the recruit thus providing for a healthy engaging challenging and collaborative atmosphere in which future police officers develop a clear understanding and perspective of their role within the greater context of society
