Metropolitan Governance In The Federalist Americas:

Metropolitan Governance in Latin America Alejandra Trejo Nieto, Jose L. Niño Amézquita, 2021-11-29 This book represents a powerful analysis of the challenges of metropolitan governance in all its messiness and complexity It examines Latin American metropolitan governance by focusing on the issue of public service provision and comparatively examining five of the largest and most complex urban agglomerations in the region Buenos Aires Bogota Lima Mexico City and Santiago The volume identifies and discusses the most pressing challenges associated with metropolitan coordination and the coverage quality and financial sustainability of service delivery It also reveals a number of spatial inequalities associated with inadequate provision which may perpetuate poverty and other inequalities Metropolitan Governance in Latin America will be valuable reading for advanced students researchers and policymakers tackling themes of urban planning spatial inequality public service provision and Latin American urban development

Metropolitan Governance in the Federalist

Americas Peter Spink, Peter M. Ward, Robert Hines Wilson, 2012 Despite rapid metropolitanization throughout the Americas and widespread interest in megacities few studies have examined the new governance structures needed to address issues of citizen representation and participation and the public service challenges of population expansion and increasing urban inequalities To fill that void Peter K Spink Peter M Ward Robert H Wilson and the other contributors to this volume provide original research and analysis of the principal metropolitan areas in six federalist countries of the Americas Argentina Brazil Canada Mexico the United States and Venezuela They find that a common feature of metropolitan expansion is the lack of a unified governmental structure Using a comparative research framework they examine the forms functions legitimacy and performance of emerging governmental structures Their cross national study shows that existing institutional structures and political systems impede collaboration among governments in metropolitan areas Given both the relatively few successful models at the local level and the disinterest on the part of federal governments regional governments states and provinces seem to provide the most pragmatic bases for constructing metropolitan governments that are capable of efficiently delivering services Because there is no direct path to achieve such new structures the authors urge reform at the state and local levels to address the need to work out the politics and management structures that will function best within their own politics Metropolitan Governance in the Federalist Americas makes an important contribution to the broader debate on subnational governance and to the specific debate on metropolitan governance The authors provide an excellent accessible description and explanation of the wide variation in forms rules and outcomes associated with metropolitan governance in the Americas A significant and useful feature of the volume is the authors inclusion of case studies they allow the reader to think productively about political history economics and the sociocultural context Brian Wampler Boise State University

Governance and Opportunity in Metropolitan America Committee on Improving the Future of U.S. Cities Through Improved Metropolitan Area Governance, Commission on Behavioral and Social Sciences and Education, Division of

Behavioral and Social Sciences and Education, National Research Council, 1999-09-24 America's cities have symbolized the nation's prosperity dynamism and innovation Even with the trend toward suburbanization many central cities attract substantial new investment and employment Within this profile of health however many urban areas are beset by problems of economic disparity physical deterioration and social distress This volume addresses the condition of the city from the perspective of the larger metropolitan region It offers important thought provoking perspectives on the structure of metropolitan level decisionmaking the disadvantages faced by cities and city residents and expanding economic opportunity to all residents in a metropolitan area The book provides data real world examples and analyses in key areas Distribution of metropolitan populations and what this means for city dwellers suburbanites whites and minorities How quality of life depends on the spatial structure of a community and how problems are based on inequalities in spatial opportunity with a focus on the relationship between taxes and services The role of the central city today the rationale for revitalizing central cities and city suburban interdependence The book includes papers that provide in depth examinations of zoning policy in relation to patterns of suburban development regionalism in transportation and air quality the geography of economic and social opportunity social stratification in metropolitan areas and fiscal and service disparities within metropolitan areas

Agents and Structures in Cross-Border Governance Bruno Dupeyron, Andrea Noferini, Tony Payan, 2023-11-01 In North America and Europe cross border governance arrangements have provided formal and informal frameworks to support cross border cooperation Analysing how these frameworks have emerged the ways in which they have become institutionalized and the processes by which they change is fundamental Moreover these frameworks are increasingly challenged by border securitization thus limiting or jeopardizing decades of cross border cooperative governance and coordinated public policies Agents and Structures in Cross Border Governance offers a series of case studies that explore these complex dynamics To understand a range of cross border governance frameworks this collection addresses such topics as infrastructure development and management resource sharing regional politics economics security human rights the environment culture and community The book explains how cross border governance schemes have sought to mitigate some of the negative consequences of border security policies allowing readers to discern how concrete national power struggles between federal national and subnational governments unfold in border areas In a world increasingly impacted by climate change and more recently the COVID 19 pandemic Agents and Structures in Cross Border Governance sheds light on the ongoing complexity of cross border governance and offers lessons to help mitigate these challenges **Metropolitan America: Challenge to**

Have the underlying ideas behind New Public Management NPM been forgotten This book investigates whether this idea is reflected in the real world of public administration or if it is mere wishful thinking The investigations in this volume comprise

studies of not only European countries but also major Asian African and Latin American countries that is countries of which much less is known regarding the developments in Public Administration reform It provides the reader with a remarkable overview of what is actually happening in countries all over the world More importantly the chapters provide ample information which is indicative for an answer to the question raised above What has remained of NPM and what is the role of NPM tools in public administration today *Steering the Metropolis* Inter American Development Bank, United Nations Human Settlements Programme, Development Bank of Latin America, 2017-10-24 A distinctive feature of urbanization in the last 50 years is the expansion of urban populations and built development well beyond what was earlier conceived as the city limit resulting in metropolitan areas This is challenging the relevance of traditional municipal boundaries and by extension traditional governing structures and institutions *Steering the Metropolis* Metropolitan Governance for Sustainable Urban Development encompasses the reflections of thought and practice leaders on the underlying premises for governing metropolitan space sectoral adaptations of those premises and dynamic applications in a wide variety of contexts Those reflections are structured into three sections Section 1 discusses the conceptual underpinnings of metropolitan governance analyzing why political technical and administrative arrangements at this level of government are needed Section 2 deepens the discussion by addressing specific sectoral themes of mobility land use planning environmental management and economic production as well as crosscutting topics of metropolitan governance finance and monitoring and evaluation Section 3 tests the concepts and their sectoral adaptations against the practice with cases from Africa America Asia and Europe **The USA and The World 2016-2017** David M. Frieden, 1966 Community, Scale, and Regional Governance Liesbet Hooghe, Gary Marks, 2016-08-18 This is the second of five ambitious volumes theorizing the structure of governance above and below the central state This book is written for those interested in the character causes and consequences of governance within the state The book argues that jurisdictional design is shaped by the functional pressures that arise from the logic of scale in providing public goods and by the preferences that people have regarding self government The first has to do with the character of the public goods provided

by government their scale economies externalities and informational asymmetries The second has to do with how people conceive and construct the groups to which they feel themselves belonging In this book the authors demonstrate that scale and community are principles that can help explain some basic features of governance including the growth of multiple tiers over the past six decades how jurisdictions are designed why governance within the state has become differentiated and the extent to which regions exert authority The authors propose a postfunctionalist theory which rejects the notion that form follows function and argue that whilst functional pressures are enduring one must engage human passions regarding self rule to explain variation in the structures of rule over time and around the world Transformations in Governance is a major new academic book series from Oxford University Press It is designed to accommodate the impressive growth of research in comparative politics international relations public policy federalism environmental and urban studies concerned with the dispersion of authority from central states up to supranational institutions down to subnational governments and side ways to public private networks It brings together work that significantly advances our understanding of the organization causes and consequences of multilevel and complex governance The series is selective containing annually a small number of books of exceptionally high quality by leading and emerging scholars The series targets mainly single authored or co authored work but it is pluralistic in terms of disciplinary specialization research design method and geographical scope Case studies as well as comparative studies historical as well as contemporary studies and studies with a national regional or international focus are all central to its aims Authors use qualitative quantitative formal modeling or mixed methods A trade mark of the books is that they combine scholarly rigour with readable prose and an attractive production style The series is edited by Liesbet Hooghe and Gary Marks of the University of North Carolina Chapel Hill and the VU Amsterdam and Walter Mattli of the University of Oxford
