While the significant body of theoretical understanding and empirical data accumulated in recent decades has done much to characterize the fluidity of evolving notions of fatherhood, the impact of this understanding on policy and legal frameworks has been uneven at an international level. In a field where groups of fathers were until recently marginalized in research, this book adopts a refreshingly inclusive attitude, aiming to motivate researchers to capture the nuanced practices of fathers in minority groups such as those who are homeless, gay, imprisoned, raising a disabled child, or from ethnically distinct backgrounds including Mexican and African American and indigenous fathers. The volume includes chapters highlighting the unique challenges and possibilities of father involvement in their children's early years of development. Contributing authors have integrated theories, research, policies, and programs on father involvement so as to attract readers with diverse interest and expertise, and material from selected countries in Asia, Australia, and Africa, as well as North America, evinces the international scope of their analysis. Their often interdisciplinary analyses draw too on historical and cultural legacies even as they project a vision of the future in which fathers' involvement in their young children's lives develops alongside the changing political, economic, and educational landscapes around the world. *Fathers across Cultures* Jaipaul L. Roopnarine, 2015-08-26 This volume offers a comprehensive up to date synopsis of fathering and father-child relationships in diverse regions of the world, helping students and practitioners alike understand cultural variations in male parenting. Interest in the role of the father and his influence on children's development and economic well-being has grown considerably. This edited volume uses detailed accounts to provide culturally situated analysis of fathering in cultures around the world. The book's contributors, a multidisciplinary group of scholars, bring together the most recent theoretical thinking and research findings on fatherhood and fathering in cultural communities across developed, recently developed, and developing societies. They address such issues as fathering and gender equality in caregiving, concepts of masculinity in contemporary societies, fathering in various ethnic groups, immigrant fathers, fathering and childhood outcomes, and social policies as they affect and are affected by issues related to fathering. Organized geographically, the book scrutinizes major sociocultural, demographic, economic, and other factors that influence men's relationships within families. It shows how economic conditions impact men's involvement with children and considers the effects of ideological belief systems and views of spousal/partner roles and responsibilities. The analysis is underpinned by recent data that underscores the significance of fathers' involvement with and investment in the well-being of their children.
