Schell, 2023-01-31 Revolution in Mexico sought to subordinate church to state and push the church out of public life Nevertheless state and church shared a concern for the nation s social problems Until the breakdown of church state cooperation in 1926 they ignored the political chasm separating them to address those problems through education in order to instill in citizens a new sense of patriotism a strong work ethic and adherence to traditional gender roles This book examines primary vocational private and parochial education in Mexico City from 1917 to 1926 and shows how it was affected by the relations between the revolutionary state and the Roman Catholic Church One of the first books to look at revolutionary programs in the capital immediately after the Revolution it

shows how government social reform and Catholic social action overlapped and identifies clear points of convergence while also offering vivid descriptions of everyday life in revolutionary Mexico City Comparing curricula and practice in Catholic and public schools Patience Schell describes scandals and successes in classrooms throughout Mexico City Her re creation of day to day schooling shows how teachers inspectors volunteers and priests even while facing material shortages struggled to educate Mexico City s residents out of a conviction that they were transforming society She also reviews broader federal and Catholic social action programs such as films unionization projects and libraries that sought to instill a new morality in the working class Finally she situates education among larger issues that eventually divided church and state and examines the impact of the restrictions placed on Catholic education in 1926 Schell sheds new light on the common cause between revolutionary state education and Catholic tradition and provides new insight into the wider issue of the relationship between the revolutionary state and civil society As the presidency of Vicente Fox revives questions of church involvement in Mexican public life her study provides a solid foundation for understanding the tenor and tenure of that age old relationship

**Asentamientos extractivos en América del Sur** Felipe Correa, 2019-02-15 Este libro reúne una serie de modelos espaciales y ofrece una visión general de unas ciudades y estrategias regionales proyectadas en la confluencia de la extracción de recursos y la integración regional en América del Sur El contenido presenta cinco casos específicos con lo que ofrece un abanico de proyectos que quedan fuera de las elaboraciones urbanas tradicionales que dieron forma a las principales metrópolis suramericanas situadas en las costas del Atlántico y del Pacífico Desde campamentos provisionales hasta capitales regionales los modelos de urbanización analizados sintetizan unas afinidades entre la construcción nacional las aspiraciones de los proyectos y la experiencia

transnacional que configuraron unos conjuntos urbanos experimentales combinados con instalaciones de extracción de recursos situados en el interior continental de América del Sur. El concepto que recorre todo el libro es el urbanismo de la extracción de recursos, una idea que no se utilizó en modo alguno en la concepción o implantación de estos proyectos y que tampoco aparece en la bibliografía existente sobre ninguno de los casos estudiados. Esta expresión se ha concebido específicamente para la presente investigación y se usa aquí para agrupar en una única denominación una serie de proyectos que abogan por lograr unas identidades urbanas nuevas y experimentales en el contexto de las iniciativas de extracción de recursos patrocinadas por los gobiernos suramericanos. El último hilo argumental compartido por los proyectos aquí estudiados es el intercambio de conceptos y experiencia técnica entre continentes y culturas. La presentación corre a cargo de Jos Fariá Tojo, catedrático de Urbanismo en la Universidad Politécnica de Madrid y de Alejo Gutiérrez Viñuales, coordinador ambiental y territorial del Centro de Documentación de Arquitectura Latinoamericana.

**Literature and "Interregnum"** Patrick Dove, 2016-06-21. Literature and Interregnum examines the unraveling of the political forms of modernity through readings of end of millennium literary texts by César Aira, Marcelo Cohen, Sergio Chejfec, Diamela Eltit and Roberto Bolaño. The opening of national spaces to the global capitalist system in the 1980s culminates in the suspension of key principles of modernity, most notably that of political sovereignty. While the neoliberal model subjugates modern forms of social organization and political decision making to an economic rationale, the market is unable to provide a new ordering principle that could fill the empty place formerly occupied by the national figure of the sovereign. The result is a situation that resembles what the Italian political philosopher Antonio Gramsci termed interregnum: an in-between time in which the old order is dying and the new cannot be born. The recoding of history as literary form provides occasions for reconsidering modern conceptualizations of aesthetic experience, mood, temporality, thought, politics, ethical experience, as well as of literature itself as social institution. In his analysis, Patrick Dove seeks to create dialogues between literature and theoretical perspectives including Continental philosophy, political thought, psychoanalysis, and sociology of globalization. The author highlights the connections between mass media, technology, politics, and economics.

### **Ancient Road Networks and Settlement Hierarchies in the New World**

Charles D. Trombold,1991-11-28 The presence of ancient road networks in the New World is a puzzle because they predate the use of wheeled transport vehicles But whatever their diverse functions may have been they remain the only tangible indication of how extinct American societies were regionally organised Contributors to this volume originally published in 1991 describe past studies of prehispanic roads in the southwestern United States Mexico Central and South America paying special attention to their significance for economic and political organisation as well as regional communication *Mexican Section: Special Catalogue and Explanatory Notes* ,1876 Texas Takes Shape Mark Lambert,James Harkins,Brian A.

Stauffer,Patrick Walsh,2025 A comprehensive volume on historical mapping in Texas Mexico and the United States William Dirk Raat,2004 NAFTA the collapse of the peso the Zapatista rebellion in Chiapas and heightened attention to illegal immigration and the drug trade are just some of the recent issues that are newly interpreted in this updated survey of U S Mexican relations Ranging from the precontact colonial eras of each country to the present day administrations of Vicente Fox and George W Bush W Dirk Raat s coverage focuses on the economic cultural and political trends and events that have regarded each other over the centuries Raat pays special attention to the factors that have subordinated Mexico not only to the Colossus of the North but to many other players in the global market He also offers a unique look at the cultural dynamics of Gran Chichimeca or Mexamerica the borderlands where the two countries share a common history **Mexico**

Metropolitan Museum of Art (New York, N.Y.),Los Angeles County Museum of Art,1990 Precolumbian art Viceregal art Nineteenth century art Twentieth century art **Cities and Nature** Lisa Benton-Short,John Rennie Short,Professor John

Rennie Short, Professor,2013-07-04 Cities and Nature illustrates how the city is part of the environment and how it is subject to environmental constraints and opportunities The city has been treated in geographical writings as only a social phenomena and at the same time environmental scientists have tended to ignore the urban This book reconnects the science

and social science through the examination of the urban. It critiques the dominant academic discourse which ignores the environmental base of urban life and living and discusses the urban natural environment and how this is subjected to social influences. The book is organized around three central themes: urban environment in historical context, issues in urban nature relations, and realigning urban nature relations. Ideas such as pollution as a physical environmental fact often created or impacted by economic, cultural, and political changes are discussed, as well as viewing pollution as a social act consuming patterns of everyday activities: driving, showering, shopping, eating, and how this has an environmental impact. The authors reintroduce a social science perspective in examining urban nature, the city, and its physical environment. *Cities and Nature* clearly illustrates the physical and social elements of the urban environment and shows how these are important to examining the city. It includes further reading and boxed case studies on Bangladesh, Paris, Delhi, Rome, Cubatao, Thailand, Los Angeles, Chicago, New Orleans, and Toronto. This book would be an asset to students and researchers in environmental studies, urban studies, and planning.

**Mexico and the United States** W. Dirk Raat, Michael M. Brescia, 2010-04-15. Drug wars, NAFTA, presidential politics, and heightened attention to Mexican immigration are just some of the recent issues that are freshly interpreted in this updated survey of Mexican-U.S. relations. The fourth edition has been completely revised and offers a lively, engaging, and up-to-date analysis of historical patterns of change and continuity, as well as contemporary issues. Ranging from Mexican antiquity and the arrival of the Spanish and British to the present-day administrations of Felipe Calderón and Barack Obama, historians Dirk Raat and Michael Brescia evaluate the political, economic, and cultural trends and events that have shaped the ways that Mexicans and Americans have regarded each other over the centuries. Raat and Brescia pay special attention to the factors that have subordinated Mexico, not only to the colossus of the North but to many other players in the global economy. They also provide a unique look at the cultural dynamics of *Gran Chichimeca* or *Mexamerica*, the borderlands where the two countries share a common history. The bibliographical essay has been revised to reflect current research and scholarship.

**European Thought and Culture, 1350-1992** Michael J. Sauter, 2021-06-06. This book explores the main currents of European thought between 1350 and 1992, which it approaches in two principal ways: culture as produced by place and the progressive unmooring of thought from previously set religious and philosophical boundaries. The book reads the period against spatial thought's history; spatial sciences such as geography or Euclidean geometry to argue that Europe cannot be understood as a continent in intellectual terms or its history organized with respect to traditional spatial geographic categories. Instead, we need to understand European intellectual history in terms of a culture that defined its own place, as opposed to a place that produced a given culture. It then builds on this idea to argue that Europe's overweening drive to know more about humanity and the cosmos continually breached the boundaries set by venerable religious and philosophical traditions. In this respect, spatial thought foregrounded the human at the unchanging's expense, with European thought slowly becoming unmoored as it doggedly produced knowledge at wisdom's expense. Michael J. Sauter illustrates this

by pursuing historical themes across different chapters including European thought's exit from the medieval period the Renaissance the Reformation the Scientific Revolution the Enlightenment and Romanticism the Industrial Revolution and war and culture offering a thorough overview of European thought during this period The book concludes by explaining how contemporary culture has forgotten what early modern thinkers such as Michel de Montaigne still knew namely that too little skepticism toward one's own certainties makes one a danger to others Offering a comprehensive introduction to European thought that stretches from the late fourteenth to the late twentieth century this is the perfect one volume study for students of European intellectual history      **National Union Catalog** ,1953
