The Ontology of Death Aaron Aquilina, 2023-05-18

Through examination of the death penalty in literature Aaron Aquilina contests Heidegger's concept of being towards death and proposes a new understanding of the political and philosophical subject Dickens Nabokov Hugo Sophocles and many others explore capital punishment in their works from Antigone to Invitation to a Beheading Using these

varied case studies Aquilina demonstrates how they all highlight two aspects of the experience First they uncover a particular state of being or more precisely non being that comes with a death sentence and second they reveal how this state exists beyond death row as sovereignty and alterity are by no means confined to a prison cell In contrast to Heidegger s being towards death which individualizes the subject only I can die my own death supposedly this book argues that when condemned to death the self and death collide putting under erasure the category of subjectivity itself Be it death row or not when the supposed futurity of death is brought into the here and now we encounter what Aquilina calls relational death Living on with death severs the subject s relation to itself the other and political sociality as a whole rendering the human less a named and recognizable being than an anonymous living corpse a human thing In a sustained engagement with Blanchot Levinas Hegel Agamben and Derrida The Ontology of Death articulates a new theory of the subject beyond political subjectivity defined by sovereignty and beyond the Heideggerian notion of ontological selfhood *Insights in consciousness research 2021* Antonino Raffone,Narayanan Srinivasan,Luca Simone,Xerxes D.
