Griffin, Daniel J. Inman, 2023-11-26 The aim of this book is to educate the beneficiaries of this technology because there is so little awareness and understanding of what can be achieved with tuned mass dampers and vibration absorbers and of the relatively small increase in mass and complexity in exchange for the tremendous benefit in vibration reduction It introduces the feedback approach to help understand why these devices work and are very helpful in modeling the devices on complicated structures The hardware demonstrators are simple and directly scalable to more complicated structures Once a reader successfully operates the demonstration hardware the concepts in the book are directly scalable to implementations on very complex structures like airplanes and rockets A recipe is provided to 3D print most of the parts as well as easy to find

brackets and sensors The whole kit can be assembled in an afternoon The directions will be similar in detail to a DIY magazine article providing simple step by step procedures Via app download the SN More Media app for free scan a link with play button and access MP4 directly on your smartphone or tablet
