Life after Privacy Firmin DeBrabander, 2020-09-08 Privacy is gravely endangered in the digital age and we the digital citizens are its principal threat willingly surrendering it to avail ourselves of new technology and granting the government and corporations immense power over us In this highly original work Firmin DeBrabander begins with this premise and asks how we can ensure and protect our freedom in the absence of privacy Can and should we rally anew to support this institution Is privacy so important to political liberty after all DeBrabander makes the case that privacy is a poor foundation for democracy that it is a relatively new value that has been rarely enjoyed throughout history but constantly persecuted and politically and philosophically suspect The vitality of the public realm he argues is far more significant to the health of our democracy but is equally endangered and often overlooked in the digital age

**Radical Secrecy** Clare Birchall, 2021-04-06 Reimagining transparency and secrecy in the era of digital data When total data surveillance delimits agency and revelations of political wrongdoing fail to have consequences is transparency the social panacea liberal democracies purport it to be This book sets forth the provocative argument that progressive social goals would be better served by a radical form of secrecy at least while state and corporate forces hold an asymmetrical advantage over the less powerful in data control Clare Birchall asks How might transparency actually serve agendas that are far from transparent Can we imagine a secrecy that could act in the service of rather than against a progressive politics To move beyond atomizing calls for privacy and to interrupt the perennial tension between state security and the public's right to know Birchall adapts douard Glissant's thinking to propose a digital right to opacity As a crucial element of radical secrecy she argues this would eventually give rise to a postsecret society offering an understanding and experience of the political that is free from the false choice between secrecy and transparency She grounds her arresting story in case studies including the varied presidential styles of George W Bush Barack Obama and Donald Trump the Snowden revelations conspiracy theories espoused or endorsed by Trump WikiLeaks and guerrilla transparency and the opening of the state through data portals Postsecrecy is the necessary condition for imagining finally an alternative vision of the good of equality as neither shaped by neoliberal incarnations of transparency nor undermined by secret state surveillance Not least postsecrecy reimagines collective resistance in the era of digital data
