**Remains of a Self** Cathrine Bjørnholt Michaelsen,2021-06-29 From the twentieth century in the twenty first psychoanalysis and deconstruction have challenged and continue to challenge our conceptions of subjectivity and selfhood Psychoanalysis revealed that even in our innermost households we are never quite alone rather instances of otherness incessantly interfere in our most intimate relation to ourselves forcing us to adapt continuously Deconstruction inheriting both this psychoanalytic disclosure and Heidegger s destruction of the history of metaphysics went to the foundations of the Western constructions of the subject and the self only to find how a destabilizing otherness was always already haunting them What if anything remains of the self in the aftermath Early on in the wake of deconstruction a certain misconceived and simplified notion of the death of the subject was proclaimed and in recent years more or less successful attempts have been made at reviving the notions of the subject the self and agency In contrast to these attempts at revival this book offers a two pronged approach On the one hand it argues that neither psychoanalysis nor deconstruction propounds a simple annihilation of the subject or liquidation of the self on the other hand however neither do they pave the way for a return to the subject or resurrection of the self that would allow us once again to become confident about our presence to ourselves Instead this book suggests that if we set ourselves the task of taking up the heritage from psychoanalysis and deconstruction in a serious manner we are obliged to retrace the subject and the self as undergoing perpetual auto deconstruction

**The Passive Eye** Branka Arsi?,2003 The Passive Eye is a revolutionary and historically rich account of Berkeley s theory of vision In this formidable work the author considers the theory of the embodied subject and its

passions in light of a highly dynamic conception of infinity Arsic shows the profound affinities between Berkeley and Spinoza and offers a highly textual reading of Berkeley on the concept of an exhausted subjectivity The author begins by following the Renaissance universe of vision particularly the paradoxical elusive nature of mirrors then shows how this conception of vision was translated into the optical devices and in what way the various ways of deception could be conceived Reading Berkeley against the backdrop of competing theories in relation to Leibniz Spinoza Newton Malebranche Hume Locke Molyneux and others this book gives a meticulous historic reconstruction of Berkeley's theory This excellent scholarly work presents Berkeley's theory in a new and radical light The book presented in three parts begins by presenting the conceptions of vision prior to Berkeley's intervention In the second part the author moves through a careful study of Descartes theory of vision to arrive at Berkeley The third part addresses the author's version of Berkeley in which the eye and the image become inseparable due to the collapse of the universe of representation The problem of vision becomes not that of representation but of presentation Through an erudite historic reading of Berkeley's theory and astute comparative assessments the author uncovers Berkeley's place as a contemporary theoretician corresponding with such thinkers as Deleuze Lacan Foucault and Derrida
