Obtaining Discovery Abroad Obtaining Discovery Abroad:

Obtaining Discovery Abroad ,2005 This newly revised and expanded edition of Obtaining Discovery Abroad assists those involved in U S litigation in understanding the legal and practical steps for bringing evidence from a foreign jurisdiction back to the United States Obtaining Discovery Abroad David S. Pennock,1990 **ABA Handbook on Discovery Abroad** American Bar Association,1989 *Antitrust Publications Catalog* , *International Law for Attorneys in Domestic Program Agencies* Legal Education Institute (U.S.),1985 **Manual for Complex Litigation, Third** ,1995 *Practice of International Litigation - Second Edition* Lawrence W. Newman,Michael Burrows,2013-12-01 A practice oriented guide for any lawyer involved in litigation or arbitration in the United States but who faces issues that go beyond its borders Both international litigation and arbitration are extensively covered in this work The chapters revolve around the practical problems which face the litigator service of proceedings discovery the obtaining of evidence and enforcement of judgments and awards In addition some important topics in substantive law are addressed **Antitrust Law Journal** ,1986

Cooperation Between Antitrust Agencies at the International Level Bruno Zanettin,2002-10-22 The issue of international antitrust enforcement is high on the agenda for both developed and developing countries Bilateral cooperation between antitrust agencies in particular the European Commission and US agencies is the focus of this new work It first shows how bilateral cooperation was developed as a response to the limits of the unilateral and extraterritorial application of national competition laws and how it has evolved from an instrument initially designed to avoid conflicts into a tool aimed at coordinating joint investigations of international competition cases It then considers how bilateral cooperation could be used optimally by analysing two forms of advanced cooperation the exchange of confidential information and positive comity which is the only satisfactory answer competition law can provide to market access cases It shows that the use of such instruments is limited by significant legal and political obstacles even in the context of the exemplary EC US relationship The book therefore argues that the efficient use of bilateral cooperation will be limited to a small number of well established competition agencies If international anticompetitive practices are to be efficiently addressed by an increasingly large and heterogeneous group of competition agencies horizontal cooperation between antitrust agencies must be complemented by a multilateral and supranational solution going beyond proposals currently put forward The book concludes that only the WTO and its dispute settlement system could provide the basis for such a system *Antitrust Law Developments (sixth)* Jonathan M. Jacobson,2007 Rev ed of Antitrust law developments fifth c2002 International Commercial Litigation Trevor C. Hartley,2015-07-02 Taking a fresh and modern approach to the subject this fully revised and restructured textbook provides everything necessary to gain a good understanding of international commercial litigation Adopting a comparative stance it provides extensive coverage of US and Commonwealth law in addition to the core areas of English and EU law Extracts from key cases and legislative acts are designed to meet the practical requirements of litigators as well as explaining the ideas

behind legal provisions Significant updates include new material on the recast of the Brussels I Regulation the impact of EU law on choice of court agreements and arbitration agreements and controversial decisions on antisuit injunctions A companion website features important updates to the law

Cartels and Anti-Competitive Agreements Sandra Marco Colino, 2017-03-02 Antitrust is fast becoming a trending topic with over 120 countries having already adopted some form of competition legislation This volume brings together carefully selected articles which reflect the evolution and progression of the regulation of joint conduct under competition law on both sides of the Atlantic and which discuss principles of fundamental importance for antitrust law The articles focus on various kinds of joint conduct between companies which might bear negative effects on competition in particular on horizontal cartels and collusion between competitors Attention is also paid to the debate surrounding the most adequate approach for vertical agreements which take place between firms operating at different levels of production Their effects on competition have traditionally been one of the most disputed issues in modern antitrust and tend to divide the principal schools of thought that have influenced the evolution of competition policy around the world The articles look primarily at two of the most established antitrust jurisdictions namely the United States and the European Union They discuss the general theoretical framework that has influenced the evolution of the law and policy cover the most

relevant practical developments provide contrasting doctrinal views and pay particular attention to the main schools of thought that have influenced antitrust in the US and the EU and are representative of the leading discussions in the course of antitrust history

International Antitrust Litigation Jurgen Basedow, Stephanie Francq, Laurence Idot, 2012-02-03 The decentralisation of competition law enforcement and the stimulation of private damages actions in the European Union go hand in hand with the increasingly international character of antitrust proceedings As a consequence there is an ever growing need for clear and workable rules to co ordinate cross border actions whether they are of a judicial or administrative nature rules on jurisdiction applicable law and recognition as well as rules on sharing of evidence the protection of business secrets and the interplay between administrative and judicial procedures This book offers an in depth analysis of these long neglected yet practically most important topics It is the fruit of a research project funded by the European Commission which brought together experts from academia private practice and policy making from across Europe and the United States The 16 chapters cover the relevant provisions of the Brussels I and Rome I and II Regulations the co operation mechanisms provided for by Regulation 1 2003 and selected issues of US procedural law such as discovery that are highly relevant for transatlantic damages actions Each contribution critically analyses the existing legislative framework and formulates specific proposals to consolidate and enhance cross border antitrust litigation in Europe and beyond

International Human Rights Litigation in U.S. Courts Beth Stephens, Michael Ratner, Judith Chomsky, Jennifer Green, Paul Hoffman, 2008-01-01 Written by leading human rights litigators and theorists this treatise offers a comprehensive analysis of human rights litigation in U S courts under the Alien Tort Statute and related provisions
