potential counter movements to these Whether because of land grabs voracious extractivism infrastructural neglect or lack of services rural peoples disillusionment with the status quo has had deeply troubling consequences and occasionally hopeful ones as the chapters in this book show The chapters in this book were originally published in The Journal of Peasant Studies

Measuring and Evaluating Sustainability Sarah E. Fredericks, 2013-08-15 The indexes used by local national and international governments to monitor progress toward sustainability do not adequately align with their ethical priorities and have a limited ability to monitor and promote sustainability This book gives a theoretical and practical demonstration of how ethics and technical considerations can aid the development of sustainability indexes to overcome this division in the literature and aid sustainability initiatives Measuring and Evaluating Sustainability develops and illustrates methods of linking technical and normative concerns during the development of sustainability indexes Specifically guidelines for index development are combined with a pragmatic theory of ethics that enables ethical collaboration among people of diverse ethical systems Using the resulting method of index development the book takes a unique applied turn as it ethically evaluates multiple sustainability indexes developed and used by the European Commission researchers and local communities and suggests ways to improve the indexes The book emphasizes justice as it is the most prevalent ethical principle in the sustainability literature and most neglected in index development In addition to the ethical principles common to international sustainability initiatives the book also employs a variety of religious and philosophical traditions to ensure that the ethical evaluations performed in the text align with the ideals of the communities using the indexes and foster cross cultural ethical dialogue This volume is an invaluable resource for students researchers and professionals working on sustainability indicators and sustainability policy making as well as interdisciplinary areas including environmental ethics environmental philosophy environmental or social justice ecological economics businesses sustainability programs international development and environmental policy making *Greening Social Work Education* Susan Hillock, 2024-03-01 Despite urgent calls for global action sustainable social work practice and a solid green theoretical knowledge base North American social work and helping professions have been slow to learn from community activists acknowledge the international climate emergency and act collectively to achieve climate justice *Greening Social Work Education* examines how social work educators can best incorporate sustainability content into social work curricula integrate green teaching methods and mobilize students and colleagues towards climate action justice and leadership Drawing on Canadian content this collection highlights Indigenous eco feminist collective action and multi interdisciplinary approaches to social work The book provides a rationale for why the topic of greening is important for social work and the helping professions discussion of current debates tensions and issues useful ideas related to innovative interdisciplinary theoretical approaches analyses and constructs and practical recommendations for teaching green social work education In doing so *Greening Social Work Education* strives to help social workers and educators gain the confidence and tools they

need to transform their teaching and curricula **A New Environmental Ethics** Holmes Rolston III, 2012-04-23 No one looking ahead at the middle of the last century could have foreseen the extent and the importance of the ensuing environmental crises Now more than a decade into the next century no one can ignore it A New Environmental Ethics the Next Millennium for Life on Earth offers clear powerful and oftentimes moving thoughts from one of the first and most respected philosophers to write on the environment Rolston an early and leading pioneer in studying the moral relationship between humans and the earth surveys the full spectrum of approaches in the field of environmental ethics This book however is not simply a judicious overview Instead it offers critical assessments of contemporary academic accounts and draws on a lifetime of research and experience to suggest an outlook for the future As a result this focused forward looking analysis will be a necessary complement to any balanced textbook or anthology in environmental ethics and will teach its readers to be responsible global citizens and residents of their landscape helping ensure that the future we have will be the one we wish for *Pour la sécurisation alimentaire au Québec* Mélanie Doyon, Juan-Luis Klein, 2019-08-28 T00:00:00-04:00 La sécurité alimentaire est l'un des plus vieux enjeux du monde Dans plusieurs régions du globe l'insécurité alimentaire est présente de manière quasi permanente et d'autres connaissent une résurgence intermittente de celle-ci parfois dans ses expressions extrêmes les crises alimentaires voire les famines En contrepartie au Québec l'instar de la plupart des pays du Nord l'insécurité alimentaire atteint des niveaux d'une ampleur plus modeste Le phénomène n'est toutefois pas inexistant Des individus des groupes des populations entières font face ce type de situation entre autres en raison de l'inaccessibilité physique des aliments de la précarité financière et de la vulnérabilité sociosanitaire des gens du décalage culturel de l'insalubrité et de la perte des ressources productives Les milieux sont donc amenés à agir Le présent ouvrage illustre les processus permettant de lutter contre cette insécurité Plus précisément les auteurs mettent en lumière les dimensions territoriales de la sécurisation alimentaire au Québec en portant une attention particulière aux dynamiques actuelles et la mobilisation des ressources Ils présentent des cas issus des milieux urbains ruraux et périurbains ainsi que centraux et périphériques et mettent en évidence la nature territorialisée et territorialisante des initiatives de sécurisation alimentaire Mélanie Doyon titulaire d'un doctorat en géographie de l'Université de Montréal est professeure au Département de géographie de l'Université du Québec Montréal UQAM Elle est membre du Centre de recherche sur les innovations sociales CRISES Elle s'intéresse au développement et la planification territoriale en milieu rural notamment aux questions agricoles et de sécurisation alimentaire Juan-Luis Klein détenteur d'un doctorat en géographie de l'Université Laval est professeur titulaire au Département de géographie de l'UQAM et membre du CRISES Son enseignement et ses travaux portent sur la géographie socio-économique l'innovation sociale et les nouveaux modèles d'action en développement des territoires **Design, Ecology, Politics** Joanna Boehnert, 2018-02-08 Design Ecology Politics links social and ecological theory to design theory and practice critiquing the ways in which the design industry perpetuates unsustainable development Boehnert argues that when design does engage

with issues of sustainability this engagement remains shallow due to the narrow basis of analysis in design education and theory The situation is made more severe by design cultures which claim to be apolitical Where design education fails to recognise the historical roots of unsustainable practice it reproduces old errors New ecologically informed design methods and tools hold promise only when incorporated into a larger project of political change Design Ecology Politics describes how ecological literacy challenges many central assumptions in design theory and practice By bringing design ecology and socio political theory together Boehnert describes how power is constructed reproduced and obfuscated by design in ways which often cause environmental harms She uses case studies to illustrate how communication design functions to either conceal or reveal the ecological and social impacts of current modes of production The transformative potential of design is dependent on deep reaching analysis of the problems design attempts to address Ecologically literate and critically engaged design is a practice primed to facilitate the creation of viable sustainable and just futures With this approach designers can make sustainability not only possible but attractive

Understanding Neoliberal Rule in K-12 Schools Mark Abendroth, Brad J. Porfilio, 2015-06-01 The word fundamentalism usually conjures up images of religions and their most zealous followers Much less often the word appears in connection with political economy The phrase free market gives the connotation that capitalism is freedom Neoliberalism is the rise of global free market fundamentalism It reaches into nearly every aspect of our daily lives as it seeks to dominate and eliminate the last vestiges of public domains through wanton privatization and deregulation It degrades all that is public The good news is that a global community of resistance continues to struggle against neoliberal oppression Formal and informal education entities contribute to these struggles offering visions and strategies for creating a better future The purpose of this volume is twofold Several contributors will highlight how the neoliberal agenda is impacting educational policy formation teaching and learning and relationships between K 12 schools and communities Other contributors will highlight how the global community has gradually become conscious of the ideological doctrine and how it is responsible for human suffering and misery The volume is needed because the growing body of educational research linked to exploring the impact of neoliberalism on schools and society fails to provide conceptual or historical understanding of this ideology It is also an important scholarly intervention because it provides insights as to why educators scholars and other global citizens have challenged the intrusion of market forces over life inside K 12 schools Teacher educators schoolteachers and anyone who yearns to understand what is behind the debilitating trend of commercial forces subverting humanizing educational projects would benefit from this volume Activists educators youth and scholars who seek strategies and visions for building democratic schools and a society would consider this volume essential reading
