Occupy the Economy Richard Wolff, David Barsamian, 2012-05 From prominent economist Richard Wolff and David Barsamian a hot button primer on the taboo subject impacting most Americans today the failure of capitalism to deliver public good

Occupy the Economy Richard D. Wolff, David Barsamian, 2012-05-08 Today's economic crisis is capitalism's worst since the Great Depression Millions have lost jobs homes and healthcare Many with jobs watch pensions benefits and job security decline While most live with increasing uncertainty the system makes the very wealthy even richer In eye opening interviews with prominent economist Richard Wolff David Barsamian probes the root causes of the current crisis its unjust social costs and what can and should be done to turn things around While others blame corrupt bankers and unregulated speculators or the government or even the poor who borrowed the authors show that the causes of the crisis run much deeper They reach back to the 1970s when the capitalist system itself shifted ending the century old pattern of rising wages for Americans and thereby enabling the top 1% to become ultra rich at the expense of the 99% Since then economic injustice has become chronic and further corrupted politics Occupy's indignation with the whole system mobilizes a diverse range of Americans who seek basic change Occupying the Economy not only clarifies and analyzes the crisis in US capitalism today it also points toward solutions that can shape a far better future for all Richard Wolff is professor of economics at U Mass and visiting professor at the New School in New York City He hosts a program on WBAI and is author of the hit book *Capitalism Hits the Fan* David Barsamian is director of Alternative Radio and author of many interview books including *What We Say Goes* with Noam Chomsky

Biblical and Pastoral Bridgework Denise Dombkowski Hopkins, Michael S. Koppel, 2023-09-18 Whether singly or jointly authored these essays model dynamic interactive reading of human situations and biblical texts The exchange between texts and human situations reveals the multivalent complexities of both human situations and scriptural texts and cautions against a simplistic use of the Bible and of pastoral theory and practices Drawing upon both texts throughout the Bible and diverse psychological theories the authors bridge the long standing divide between the classical and practical disciplines in biblical studies and pastoral care The aim of this book is to spur readers imaginations toward critical engagement with the Bible and with one another to promote healing connection and justice in a world crying out for wholeness Gems hidden in plain sight within the Bible can become powerful tools for illuminating the pains and promises of the human condition

The Coming Jesus and the Anthropocene Ryan LaMothe, 2024-02-22 Melting glaciers and icecaps massive forest fires enormous storms extensive and prolonged flooding and desertification of large tracts of land are realities we currently face and will continue to struggle with as a result of climate change Our climate crisis invites if not demands a critical evaluation of our political religious economic and cultural narratives and rituals that give rise to our ways of relating to one another to other species and to planet Earth This book argues that the climate emergency exposes deep problematic roots of Western religious and political paradigms and apparatuses that undergird

ideas of and methods for human flourishing In particular Western religious and political philosophies have produced and maintained a radical rift between human beings and other species as well as beliefs about human dominion over other species and the earth These ideas and practices are responsible for the colonization of Nature and for climate change Understanding these sources invites a radical reimagining of our religious ideas and practices Specifically this book proposes a coming Jesus a form of life that traverses the rift while denying human and divine dominion for the sake of recognizing and respecting the singularities and flourishing of all species
