resources such as ten year old triplets who converse with her about dinosaurs and a Connecticut museum where portraits of her ancestors hang on the walls Through lively descriptions of these visits Hunting advances a view of history as nonlinear and full of unlikely coincidences For Want of Wings is also the carefully researched story of the least known of Yale s four expeditions into the American West led by eminent paleontologist O C Marsh the friendship between Russell s father and abolitionist John Brown a portrait of a mother and daughter evolving in self understanding and an inquiry into matters of race in American history and the author s own family In the end all these pieces converge like fragments of a fossil to form an exquisitely patterned work of historical exploration

Mapes, 2007-09-09 Cephalopods are diverse highly developed molluscs capable of swimming and jet propulsion These animals are an important component of present day marine ecosystems throughout the world and comprise approximately 900 species They also have an extraordinary fossil record extending back to the Cambrian Period with as many as 10 000 extinct species Throughout their long history they have experienced spectacular radiations and near total extinctions Because of their superb fossil record they also serve as ideal index fossils to subdivide geologic time This book touches on many of these themes and it treats both fossil and present day cephalopods The chapters are outgrowths of presentations at the Sixth International Symposium Cephalopods Present and Past at the University of Arkansas in Fayetteville September 16 19 2004 The Symposium was organized principally by Walter L Manger of the Department of Geology University of Arkansas The editors gratefully acknowledge Walter for his terrific job in putting together this symposium and for making it such an intellectual and social success Other publications related to this Symposium include the abstract volume assembled by W L Manger and two field trip guidebooks one written by W L Manger and the other by R H Mapes Because this symposium was held in North America it honored four cephalopod workers from this continent William A Cobban US Geological Survey Denver Colorado Brian F Glenister University of Iowa Iowa City Iowa William M Furnish University of Iowa Iowa City Iowa and Gerd E G *Sea Monsters* Michael J. interpret these changing environments and their impact on the Cretaceous ecosystem The volume closes with a description of the recent drilling of the Chicxulub bolide impact site
