Meaning and Mental Representations Umberto Eco,1988 *Meaning and Mental Representations* Umberto Eco,Marco Santambrogio,Patrizia Violi,1988 an excellent collection Journal of Language Social Psychology An important collection of original essays by well known scholars debating the questions of logical versus psychologically based interpretations of language Trames ,1997 Ancient Near Eastern Iconography and the Bible Hans Ulrich Steymans,2024-10-31 Examines the dilemma of whether ancient Near Eastern images while providing unique aspects of the world views of the cultures from which the Bible arose can be interpreted in a way that traceably relates them to the biblical text To avoid the danger of using images merely as illustrations for concepts found in the Bible one first needs to behold the image with its own right to been seen The essays within this volume describe the methods developed by Othmar Keel for bringing imagery into a dialogue with texts from the ancient Orient and their own interpretation including previously unpublished material from Keel The contributions begin with an overview of the scholarly work of Keel and the development of his aims and methods including a revision of an article dealing with semiology in the interpretation of art The book proceeds to address the research history of iconology in art history presenting the methodology of Erwin Panofsky and one of his influential predecessors Charles Clermont Ganneau in contrast with Keel s three methodological steps leading from iconographic analysis to iconology Contributors then present two case studies of how Keel s method can be applied to interpret Egyptian and Mesopotamian images allowing insights into the worldview of an ancient culture and the aim of iconology The book concludes with a report about how iconographic analysis and iconology is taught on University level

Terry Warner, 1995 This book is about the limits of machine translation It is widely recognized that machine translation systems do much better on domain specific controlled language texts domain texts for short than on dynamic general language texts general texts for short The authors explore this general domain distinction and come to some

uncommon conclusions about the nature of language Domain language is claimed to be made possible by general language while general language is claimed to be made possible by the ethical dimensions of relationships Domain language is unharmed by the constraints of objectivism while general language is suffocated by those constraints Along the way to these conclusions visits are made to Descartes and Saussure to Chomsky and Lakoff to Wittgenstein and Levinas From these conclusions consequences are drawn for machine translation and translator tools for linguistic theory and translation theory The title of the book does not question whether language is possible it asks with wonder and awe why communication through language is possible *The Place of the Mosque* Akel Ismail Kahera,2022-06-14
