Measurement and Evaluation in Human Performance has been reorganized to offer a logical progression of information that makes it easy for instructors and students to apply the content to their specific courses and career goals. It is enhanced with added expertise from new coauthor Weimo Zhu, an internationally known scholar in Kinesmetrics who served as the chair of the Measurement and Evaluation Council of SHAPE America. The amount of information on physical activity assessment has been increased across all chapters and the text includes new content about sport video analysis, apps, employment, related testing, and more. The text is divided into four parts. Part I introduces the concepts of measurement and evaluation and their importance for decision making in human performance. Part II explains the use of statistics as core tools and resources for these evaluations and explains the various forms of statistical procedures often used in measurement. Part III presents reliability and validity from theoretical, comprehensive, and criterion-referenced perspectives. Skills gained through previous sections are applied to human performance issues such as evaluating a person's aerobic capacity or muscular strength. Part IV applies all of the content from the previous sections to practical settings where students will use the knowledge gained in the text, covering topics like fitness assessment, performance assessment, motor behavior, and sport and exercise psychology. To enhance student comprehension and retention, related online learning aids are delivered through HKPropel. Sample data sets allow students to practice data analysis, as do a wide range of study and practice activities. Chapter quizzes may be assigned to students by instructors and are automatically graded within HKPropel. In addition, Mastery Item sidebars throughout the text include problems and activities that test student knowledge, while Measurement and Evaluation Challenge sidebars provide scenarios that can be evaluated with the information from the chapter.

**Measurement and Evaluation in Physical Activity Applications** Phillip A. Bishop, 2018-09-03

Measurement and Evaluation in Physical Activity Applications offers the most accessible student-friendly introduction to the principles and practice of measurement in physical activity available. Fully revised and updated, the second edition provides students with a clear guide to the obstacles to good measurement and how to apply the principles of good measurement to a range of physical activity disciplines. Spanning applications in exercise science, sports performance, physical education, sports coaching, athletic training, and physical activity and health, the book also includes chapters on the key principles underlying good measurement practice: validity, reliability, and objectivity, as well as an introduction to using statistics and qualitative measurement. Structured to reflect single semester classes and involving students at every stage through its rich pedagogy and accessibility, this is a crucial resource for introducing students to the principles of best practice in measurement and evaluation. It is the ideal learning aid for any students studying measurement, evaluation, or assessment in kinesiology, exercise science, sports coaching, physical education, athletic training, and health and
