VV.,2016-01-07T00:00:00+01:00 1862 193 **Urban Expansion, Land Cover and Soil Ecosystem Services**

Ciro Gardi, 2017-04-07 More than half of the world population now lives in cities and urban expansion continues as rural people move to cities This results in the loss of land for other purposes particularly soil for agriculture and drainage This book presents a review of current knowledge of the extension and projected expansion of urban areas at a global scale Focusing on the impact of the process of land take on soil resources and the ecosystem services that they provide it describes approaches and methodologies for detecting and measuring urban areas based mainly on remote sensing together with a review of models and projected data on urban expansion The most innovative aspect includes an analysis of the drivers and especially the impacts of soil sealing and land take on ecosystem services including agriculture and food security biodiversity hydrology climate and landscape Case studies of cities from Europe China and Latin America are included The aim is not only to present and analyse this important environmental challenge but also to propose and discuss solutions for the limitation mitigation and compensation of this process The UK Regional-National Economic Problem Philip McCann, 2016-03-10 In recent years the United Kingdom has become a more and more divided society with inequality between the regions as marked as it has ever been In a landmark analysis of the current state of Britain's regional development Philip McCann utilises current statistics examines historical trends and makes pertinent international comparisons to assess the state of the nation The UK Regional National Economic Problem brings attention to the highly centralised top down governance structure that the UK deploys and demonstrates that it is less than ideally placed to rectify these inequalities The North South divide in the UK has never been greater and the rising inequalities are evident in almost all aspects of the economy including productivity incomes employment status and wealth Whilst the traditional economic dominance of London and its hinterland has continued along with relative resilience in the South West of England and Scotland in contrast the Midlands the North of England Northern Ireland and Wales lag behind by most measures of prosperity This inequality is greatly limiting national economic performance and the fact that Britain has a below average standard of living by European and OECD terms has been ignored The UK's economic and governance inequality is unlikely to be fundamentally rebalanced by the current governance and connectivity trends although this definitive study suggests that some areas of improvement are possible if they are well implemented This pivotal analysis is essential reading for postgraduate students in economics and urban studies as well as researchers and policy makers in local and central government *OECD Regional Outlook 2016 Productive Regions for Inclusive Societies* OECD, 2016-10-11 The OECD Regional Outlook 2016 examines the widening productivity gap across regions within countries and the implications of these trends for the well being of people living in different places *OECD Development Pathways Multi-dimensional Review of Thailand (Volume 2) In-depth Analysis and Recommendations* OECD, 2019-02-14 Thailand is a fast emerging country that aspires to become a high income economy by 2037 Still Thailand's growth path has created large disparities that risk obstructing the next stage of development This report lays out three transitions that Thailand needs to master to build capabilities OECD Reviews of Regulatory Reform

Regulatory Policy in Chile Government Capacity to Ensure High-Quality Regulation OECD,2016-04-25 Chile enjoys a very sound macroeconomic framework and economic resilience partly due to a prudent regulatory and supervisory framework for its financial system Nevertheless Chile lacks a comprehensive regulatory reform programme This report examines how Chile can ensure high quality regulation **OECD Economic Surveys: European Union 2021** OECD,2021-09-10 The COVID 19 pandemic plunged the EU into its worst ever recession and risks increasing inequalities notably between regions Thanks to a bold and innovative policy response including a common instrument to finance national recovery plans Next Generation EU growth is rebounding but ambitious reforms will be essential to heal the scars of the pandemic and succeed in the green and digital transitions **Making Global Society** Barry Buzan,2023-08-10 Barry Buzan proposes a new approach to making International Relations a truly global discipline that transcends both Eurocentrism and comparative civilisations He narrates the story of humankind as a whole across three eras using its material conditions and social structures to show how global society has evolved Deploying the English School s idea of primary institutions and setting their story across three domains interpolity transnational and interhuman this book conveys a living historical sense of the human story whilst avoiding the overabstraction of many social science grand theories Buzan sharpens the familiar story of three main eras in human history with the novel idea that these eras are separated by turbulent periods of transition This device enables a radical retelling of how modernity emerged from the late 18th century He shows how the concept of global society can build bridges connecting International Relations Global Historical Sociology and Global World History **OECD Economic Surveys: India 2017** OECD,2017-02-28 This 2017 OECD Economic Survey of India examines recent economic developments policies and prospects The special chapters cover tax reform and regional development *OECD Regional Development Studies Governance of Land Use in Poland The Case of Lodz* OECD,2016-08-12 This report on the governance of land use in Lodz Poland illustrates many promising practices and offers guidance on how to make the governance structure and planning system more coherent and robust both in Lodz and in Poland more generally **Global State of National Urban Policy** OECD,United Nations Human Settlements Programme,2018-03-20 With two thirds of the world s population projected to live in urban areas by the middle of this century the accelerating pace of urbanisation generates crucial opportunities and challenges for sustainable development that reach far beyond city boundaries Many global processes have recognised
