

Obesity, Business and Public Policy

Edited by **Zoltan J. Acs and Alan Lyles**

With a Foreword by Michael Huckabee

Obesity Business And Public Policy Obesity Business And Public Policy

Marcel A. Müller

Obesity Business And Public Policy Obesity Business And Public Policy:

Obesity, Business and Public Policy Zoltán J. Ács,2010-01-01 The effects of obesity have become practically ubiquitous in the US This book aims to provide an alternative framework through which to explore the important and controversial obesity debate that has spilled over from the medical community This book is not about obesity as a medical condition nor does it offer a wide ranging discussion on the health effects of obesity or the role of the right diet The ^ABeauty Bias Deborah L. Rhode,2010-05-06 Beauty may be only skin deep but the damages associated with its absence go much deeper Unattractive individuals are less likely to be hired and promoted and are assumed less likely to have desirable traits such as goodness kindness and honesty Three quarters of women consider appearance important to their self image and over a third rank it as the most important factor Although appearance can be a significant source of pleasure its price can also be excessive not only in time and money but also in physical and psychological health Our annual global investment in appearance totals close to 200 billion Many individuals experience stigma discrimination and related difficulties such as eating disorders depression and risky dieting and cosmetic procedures Women bear a vastly disproportionate share of these costs in part because they face standards more exacting than those for men and pay greater penalties for falling short The Beauty Bias explores the social biological market and media forces that have contributed to appearance related problems as well as feminism s difficulties in confronting them The book also reviews why it matters Appearance related bias infringes fundamental rights compromises merit principles reinforces debilitating stereotypes and compounds the disadvantages of race class and gender Yet only one state and a half dozen localities explicitly prohibit such discrimination The Beauty Bias provides the first systematic survey of how appearance laws work in practice and a compelling argument for extending their reach The book offers case histories of invidious discrimination and a plausible legal and political strategy for addressing them Our prejudices run deep but we can do far more to promote realistic and healthy images of attractiveness and to reduce the price of their pursuit **Integrating Human Capital with Human Development** John F. Tomer,2016-04-05 For the most part human capital theory emphasizes human cognitive development and the acquisition of knowledge and skills that enable enhanced productivity and earnings In light of recent research findings particularly concerning neurodevelopment and early childhood development it is becoming apparent that this standard version of human capital theory has a far too limited conception of human capabilities and how they are created Integrating Human Capital with Human Development considers recently accumulated knowledge related to the human brain s functioning and development to better understand the relationship between human capital and human development in successful economies It shifts the focus of human capital theory to give full consideration to intangible non cognitive aspects of learning This exciting new volume is an important addition to the study of human capital and behavioral economics more broadly **The Economics of Obesity** Tahereh Alavi Hojjat,2021-08-20 Much has been written about the economic causes of obesity but this book offers a comprehensive and

deep investigation of the causes and treatment of these issues in a single volume In the second edition the author expands upon the serious threat that obesity poses not only to our health but also to our society Obesity costs billions of dollars a year in lost productivity and medical expenses The social distribution of obesity has changed over time Obesity rates in the United States continue to worsen in parallel with income inequality Socioeconomic groups with low personal capital levels of education and income have higher obesity rates In fact the rate of obesity has increased the fastest among low income Americans The disproportionate burden of obesity on the poor poses an economic challenge and an ethical imperative The link between obesity inactivity and poverty may be too costly to ignore because obesity associated chronic disease already accounts for 70% of US healthcare costs Although economic and technological changes in the environment drove the obesity epidemic the evidence for effective economic policies to prevent obesity remains limited The new edition brings together a multitude of topics on obesity previously not discussed with a particular emphasis on the influence of poverty and income inequality on obesity including Economic Analysis Behavioral Patterns Diet Choice and the Role of Government Income and Wealth Inequality and Obesity Social Mobility and Health Food Policies Government Interventions and Reducing Poverty The Economics of Obesity is an essential text for readers interested in learning about the causes and consequences of obesity within a social context including students academicians and practitioners in public health medicine social sciences and health economics both in and outside of the United States US and international policy makers also will find the book a salient read in addressing the issues that contribute to the cycle of poverty income inequality and obesity

The Oxford Handbook of the Social Science of Obesity John Cawley, 2011-11-17 There is an urgent need to better understand the causes and consequences of obesity and to learn what works to prevent or reduce obesity This volume accurately and conveniently summarizes the findings and insights of obesity related research from the full range of social sciences including anthropology economics government psychology and sociology It is an excellent resource for researchers in these areas both bringing them up to date on the relevant research in their own discipline and allowing them to quickly and easily understand the cutting edge research being produced in other disciplines The Oxford Handbook of the Social Science of Obesity is a critical reference for obesity researchers and is also valuable for public health officials policymakers nutritionists and medical practitioners The first section of the book explains how each social science discipline models human behavior in particular diet and physical activity and summarizes the major research literatures on obesity in that discipline The second section provides important practical information for researchers including a guide to publicly available social science data on obesity and an overview of the challenges to causal inference in obesity research The third part of the book synthesizes social science research on specific causes and correlates of obesity such as food advertising food prices and peers The fourth section summarizes social science research on the consequences of obesity such as lower wages job absenteeism and discrimination The fifth and final section reviews the social science literature on obesity treatment and prevention such as

food taxes school based interventions and medical treatments such as anti obesity drugs and bariatric surgery Social Justice and the Urban Obesity Crisis Melvin Delgado,2013-04-30 A number of economic cultural and contextual factors are driving urban America s obesity crisis which can create chronic health conditions for those least able to manage them Considering urban obesity through a social justice lens this book is the first to help social workers and others develop targeted interventions for effective outcomes The text dissects the problem of urban obesity in populations of color from individual family group community and policy perspectives Beginning with a historical survey of urban obesity in communities of color anti obesity policies and programs and the role of social work in addressing this threat the volume follows with an analysis of the social ecological environmental and spatial aggravators of urban obesity such as the food industry s advertising strategies which promote unhealthy choices the failure of local markets to provide good food options the lack of safe exercise spaces and the paucity of health education Melvin Delgado reviews recent national obesity statistics explores the connection between food stamps and obesity and reveals the financial and social consequences of the epidemic for society as a whole He concludes with recommendations for effective health promotion programs such as youth focused interventions community gardens and community based food initiatives and a unique consideration of urban obesity in relation to acts of genocide and national defense What Women Want Deborah L. Rhode,2014-08-01 What Women Want comprehensively analyzes the challenges the feminist movement faces today and puts forward a new policy agenda for women **Practical Ethics for Food Professionals** J. Peter Clark,Christopher Ritson,2013-05-07 This book offers a practical guide to the most pressing ethical issues faced by those working in food manufacturing and associated industries Early chapters look at the fundamentals of ethical thinking and how lessons of medical ethics might be applied to the food industry The book then addresses some issues specifically relevant to the food industry including treatment of animals the use of genetically modified organisms food product advertising health claims and sustainability Several further chapters present case studies which show how ethical thinking can be applied in real life examples This volume should be on the desk of every food industry professional responsible for important decisions about science marketing resources sustainability the environment and people International Handbook of the Demography of Obesity Ginny Garcia-Alexander,Dudley L. Poston, Jr.,2022-09-21 This handbook provides a demographic examination of global obesity trends by bringing together the range of research conducted in this field by demographers sociologists epidemiologists and other quantitatively and demographically oriented social scientists It utilizes a multidisciplinary demographic approach to provide insights into the global prevalence and mechanisms of obesity as well as the population level impacts of rising obesity Major sections include global obesity trends and prevalence obesity and demographic structures processes and characteristics emerging areas of study and obesity in LGBAT populations This handbook provides readers with a broad understanding of population based research on obesity and serves as a resource for scholars students policymakers and researchers The Oxford Handbook of the

Economics of Poverty Philip N. Jefferson, 2012-11-29 This Handbook examines poverty measurement anti poverty policy and programs and poverty theory from the perspective of economics It is written in a highly accessible style that encourages critical thinking about poverty What s known about the sources of poverty and its alleviation are summarized and conventional thinking about poverty is challenged

The Routledge Handbook of the Political Economy of Health and Healthcare David Primrose, Rodney D. Loepky, Robin Chang, 2024-02-28 This handbook provides a comprehensive and critical overview of the gamut of contemporary issues around health and healthcare from a political economy perspective Its contributions present a unique challenge to prevailing economic accounts of health and healthcare which narrowly focus on individual behaviour and market processes Instead the capacity of the human body to reach its full potential and the ability of society to prevent disease and cure illness are demonstrated to be shaped by a broader array of political economic processes The material conditions in which societies produce distribute exchange consume and reproduce and the operation of power relations therein influence all elements of human health from food consumption and workplace safety to inequality healthcare and housing and even the biophysical conditions in which humans live This volume explores these concerns across five sections First it introduces and critically engages with a variety of established and cutting edge theoretical perspectives in political economy to conceptualise health and healthcare from neoclassical and behavioural economics to Marxist and feminist approaches The next two sections extend these insights to evaluate the neoliberalisation of health and healthcare over the past 40 years highlighting their individualisation and commodification by the capitalist state and powerful corporations The fourth section examines the diverse manifestation of these dynamics across a range of geographical contexts The volume concludes with a section devoted to outlining more progressive health and healthcare arrangements which transcend the limitations of both neoliberalism and capitalism This volume will be an indispensable reference work for students and scholars of political economy health policy and politics health economics health geography the sociology of health and other health related disciplines Chapters 1 8 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons CC BY NC ND 4 0 license

Personality and Cognition in Economic Decision Making Aurora García-Gallego, Manuel I. Ibáñez, Nikolaos Georgantzis, 2017-08-22 Psychologists studying cognitive processes and personality have increasingly benefited from the wealth of theory methodology and decision making paradigms used in economics and game theory Similarly for the economists personality traits and basic cognitive processes offer a set of coherent explanatory constructs in economic behavior Given the debate on preference invariance and behavioral consistency across contexts and domains the papers in this topic shed light on the existence and effect of stable sets of idiosyncratic features on economic decision making While the effects of personality and cognition on economic decisions remain under explored the papers contributed in this topic offer more than a stimulus for further research The general message could be that personality and cognitive processes offer the stable idiosyncratic ground on which individual

decisions are made The Business of Food Gary Allen,Ken Albala,2007-10-30 The business of food and drink is for better and worse the business of our nation and our planet and to most consumers how it works remains largely a mystery This encyclopedia takes readers as consumers behind the scenes of the food and drink industries The contributors come from a wide range of fields and the scope of this encyclopedia is broad covering from food companies and brands to the environment health science and technology culture finance and more The more than 150 essay entries also cover those issues that have been and continue to be of perennial importance Historical context is emphasized and the focus is mainly on business in the United States Most entries include Further Reading The frontmatter includes an Alphabetical List of Entries and a Topical List of Entries to allow the reader to quickly find subjects of interest Numerous cross references in the entries and blind entries provide other search strategies The person and subject index is another in depth search tool Sample entries Advertising Agribusiness Altria Animal Rights Betty Crocker Celebrity Chefs Chain Restaurants Commodities Exchange Cooking Technology Culinary Tourism Eco terrorism Environmental Protection Agency Ethnic Food Business European Union Flavors and Fragrances Food Safety Food Service Industry Genetic Engineering Internet Labor and Labor Unions Marketing to Children McDonald s Meat Packing North American Free Trade Agreement Nutrition Labeling Organic Foods Poultry Industry Slow Food SPAM Television Trader Joe s Tupperware TV Dinners Whole Foods Williams Sonoma Wine Business

Promoting Health, Preventing Disease The Economic Case OECD,World Health Organization,2015-10-29 A growing body of evidence from economic studies shows areas where appropriate policies can generate health and other benefits at an affordable cost sometimes reducing health expenditure and helping to redress health inequalities at the same time

Handbook of Business and Public Policy Kellow, Aynsley,Porter, Tony,Ronit, Karsten,2021-08-27 This comprehensive Handbook provides an analysis of the key issues accomplishments and challenges of research and practices related to the interactions between business and public policy **Employment and Work** Susanne M. Bruyère,Linda Barrington,2012-09-05 This volume in The SAGE Reference Series on Disability explores issues facing people with disabilities in employment and the work environment It is one of eight volumes in the cross disciplinary and issues based series which incorporates links from varied fields making up Disability Studies as volumes examine topics central to the lives of individuals with disabilities and their families With a balance of history theory research and application specialists set out the findings and implications of research and practice for others whose current or future work involves the care and or study of those with disabilities as well as for the disabled themselves The presentational style concise and engaging emphasizes accessibility Taken individually each volume sets out the fundamentals of the topic it addresses accompanied by compiled data and statistics recommended further readings a guide to organizations and associations and other annotated resources thus providing the ideal introductory platform and gateway for further study Taken together the series represents both a survey of major disability issues and a guide to new directions and trends and contemporary resources in the field as a whole

The Challenge of Treating Obesity and Overweight National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Food and Nutrition Board, Roundtable on Obesity Solutions, 2017-12-21 The Roundtable on Obesity Solutions of the National Academies of Sciences Engineering and Medicine held a workshop in Washington DC on April 6 2017 titled The Challenge of Treating Obesity and Overweight A Workshop The discussions covered treatments for obesity overweight and severe obesity in adults and children emerging treatment opportunities the development of a workforce for obesity treatments payment and policy considerations and promising paths to move forward This publication summarizes the presentations and discussions from the workshop

Communicating for Social Justice in Health Contexts: Creating Opportunities for Inclusivity Among Marginalized Groups Elizabeth M. Glowacki Vinita Agarwal, Vinita Agarwal, 2023-10-19

Neoliberalism 2.0: Regulating and Financing Globalizing Markets L. Nijs, 2016-01-26 In today's increasingly globalized environment many economic fundamentals need to be reconsidered in order to regain stability in the global marketplace One such consideration is the failing dynamics of the international tax infrastructure Neoliberalism 2.0 brings a 21st century assessment of the Pigovian taxes considering a completely new calibration of the international tax systems inspired by the historically developed Pigovian tax model The book considers the impact neoliberalism had and will have on regulatory infrastructure democracy in an era of globalization and reduced legitimization of the national state The Pigovian model brings home the often forgotten relationship between taxation as a part of the regulatory sphere macro economics and the political philosophical context in which law and economics emerge The model also takes into account the phenomena of globalization and financialization and is tested using the financial sector as an example This book addresses the many challenges a Pigovian shift would imply for the sovereign and its national economies Neoliberalism 2.0 demonstrates the ability to design a paradigm changing alternative to the current tax infrastructure while taking into account a low economic growth environment of the future the implications of globalization and the changing relationship between citizens and their state

EBOOK: Basic Marketing William Perreault, Joseph Cannon, E. Jerome McCarthy, 2013-04-16 Built on a strong foundation Basic Marketing 18e with ConnectPlus and LearnSmart provides an integrated teaching and learning solution for presenting the four Ps framework and managerial orientation with a strategy planning focus The Perreault franchise was the pioneer of the four Ps in the introductory marketing course The unifying focus of Basic Marketing has always been on how to make marketing decisions in deciding what customers to focus on and how best to meet their needs Consistent with our belief in continuous quality improvement this edition has been critically revised updated and rewritten to reflect new concepts new examples recent best practices and to tightly integrate the best digital tools in the industry for ensuring that students are prepared to engage in classroom lectures and pursue future business and marketing careers
