supplemental material **Petroleum and Public Safety** James B. McSwain,2018-07-06 Throughout the twentieth century
cities such as Houston Galveston New Orleans and Mobile grappled with the safety hazards created by oil and gas industries
as well as the role municipal governments should play in protecting the public from these threats James B McSwain s
Petroleum and Public Safety reveals how officials in these cities created standards based on technical scientific and
engineering knowledge to devise politically workable ordinances related to the storage and handling of fuel Each of the cities
studied in this volume struggled through protracted debates regarding the regulation of crude petroleum and fuel oil sparked
by the famous Spindletop strike of 1901 and the regional oil boom in the decades that followed Municipal governments
sought to ensure the safety of their citizens while still reaping lucrative economic benefits from local petroleum industry
activities Drawing on historical antecedents such as fire protection engineering the cities of the Gulf South came to adopt
voluntary consensual fire codes issued by insurance associations and standards organizations such as the National Board of
Fire Underwriters the National Fire Protection Association and the Southern Standard Building Code Conference The
culmination of such efforts was the creation of the International Fire Code an overarching fire protection guide that is widely
used in the United States Mexico the Caribbean and Central America In devising ordinances Gulf South officials pursued the
politics of risk management as they hammered out strategies to eliminate or mitigate the dangers associated with petroleum
industries and to reduce the possible consequences of catastrophic oil explosions and fires Using an array of original sources
including newspapers municipal records fire insurance documents and risk management literature McSwain demonstrates
that Gulf South cities played a vital role in twentieth century modernization *User's Guide to the National Electrical Code?*
